

AJR Show Oct 3rd Transcript

0:00:01 - Annncr

Julie Ryan, noted psychic and medical intuitive, is ready to answer your personal questions, even those you never knew you could ask. For more than 25 years, as she developed and refined her intuitive skills, Julie used her knowledge as a successful inventor and businesswoman to help others. Now she wants to help you to grow, heal and get the answers you've been longing to hear. Do you have a question for someone who's transitioned? Do you have a medical issue? What about your pet's health or behavior? Perhaps you have a loved one who's close to death and you'd like to know what's happening? Are you on the path to fulfill your life's purpose, no matter where you are in the world? Take a journey to the other side and ask Julie Ryan.

0:00:43 - Julie

Hi everybody, welcome to the Ask Julie Ryan show. It's where we blend spirituality and practicality to help you live a life of purpose and joy. I am so, so, so excited to talk with you this evening. As you may know, I haven't done a live show in several weeks show in several weeks. I've been traveling and then my best friend, Lisa, passed very unexpectedly, and so we did the funeral and you know that whole kind of thing, and it was tragic, and so we're all in the, I guess, in the process of healing.

The one thing that's so important, I think, in helping us heal grief is to be able to talk to our deceased loved ones, and so once I got the call that she had passed in her sleep you guys, no health problems, no on no medication, none of that, of course as soon as I got the call, when I got off the phone, I was getting her on the line, her spirit in heaven, and I said what the heck? So I've been able to talk to her and it's been so helpful. Studies show that that's the best way to heal grief is being able to talk to spirit. So whether you take one of my classes or somebody else's, please, please, please, consider learning how to talk to your deceased loved ones in heaven, because it's so comforting. Everybody has the ability and it's really easy to do. So that's number one. I'm thrilled to be back with all of you. Number two lots of love going out to all the Hurricane Helene victims here in the US. North Carolina has gotten hit really hard. Well, parts of Florida, Georgia and Tennessee seem to be the worst hit. It skirted around us here in Sweet Home, Alabama, and so Tim and I made a big donation last night. There are lots of charities that are working to help people that are stranded, and we gave to Samaritan's Purse SamaritansPurse.org, but the Red Cross, I mean, there's lots of them, so consider doing that to see what you can do to help.

And then, lastly, we are going to give away a free session with me this evening. So you want to stay tuned and see if you are the lucky winner that gets a whole hour. We'll have a whole hour to chat and you can choose from any and all of the buffet of psychicness that I talk about, and it makes it really fun and I love it when I get you for a whole hour. So we've got Chris on the Zoom and we've got my son, Jonathan, is filling in for Rachel and Samantha. They both had other stuff going on, so His Majesty is handling the YouTube chat this evening. Jonathan, you guys hear me talk about him all the time, and so if you want to join us and have a conversation with me, go to AskJulieRyanShow.com. We're also live streaming on YouTube at Ask Julie Ryan and you can just put your question in the chat. Put your first name, where you're located, and then your question, and we'll be taking questions from both.

So, Chris, I'm ready. Let's see who our first caller is. Okay, looks like Anna. And let's see where I got to put my glasses on so I can see what I'm reading here. Anna Rios.

Hi Julie, I'm Anna from Puerto Rico. Hi, Anna from Puerto Rico. I'd like to know if my father is okay and if he has a message for me. He passed in January from an accident. He fell

downstairs. Thanks, god bless you. Okay, Anna, I'm connecting from you to your dad in heaven.

So how this works is I raise my vibrational level, I'm going to watch a laser beam come from my body here in Birmingham, it's going to hook into you in Puerto Rico, and then your dad will be right next to you. They always are whenever we think of them. So here we go. Here comes my laser beam from Sweet Home, Alabama, heading to Miss Anna. All right, probably pronounce it Anna, but got you. Okay, dad, do you have a message for her?

The banana leaves are still my favorite. Perhaps that was a plant that he liked, perhaps he liked bananas, I don't know. Yeah, he's doing great, he said he's getting to do everything he wants, and he says he's perfecting his fisherman skills in heaven. So, banana leaves when we get messages from spirit, I think it's important for us to remember that it may make sense to us right away. It may make sense to us later, when we think about it, or it may pertain to something that hasn't happened yet. So be open to what it means and also be open to how it appears. Banana leaves you may see a banana plant and see actual leaves. You may see a picture of a banana leaf. You may see it on wallpaper, you may see it in an ad, you may see it online. Just be open, and any way that it appears is a message from your dad. So I hope that helps. All righty, let's see who's next. AskJulierianshow.com or Ask Julie Ryan on the YouTube live. Hi Noelle.

0:06:16 - Noelle
Hi,

Julie
how are you, girl?

Noelle
I'm great. How are you

Julie
Terrific. Where are you?

Noelle
I'm in Madison, Wisconsin.

0:06:26 - Julie
Oh, terrific, beautiful place,

Noelle
really beautiful. Right now

Julie
I bet you got the leaves turning.

0:06:34 - Noelle
Yeah, leaves are turning and starting to fall. It's beautiful.

0:06:37 - Julie
Wonderful, terrific, it's fall y'all. That's what they say here in the Deep South. It's fall y'all. Well, terrific, you got a question for me?

0:06:45 - Noelle

um, I do have a question, but before I ask my question, I do want to say that I'm the person whose um email. You answered um today, but I have a different. I figured okay, yeah, so I don't know if you want me to talk about that?

0:07:01 - Julie

no, because what Noelle's talking about everybody is. She submitted a question online and then I answered it in my blog. So just go to AskJulieRyan.com slash blog or go on the blog page. And it was a great question, Noelle. She asked about parallel lives versus past lives, and so I thought that was terrific, but you're getting a twofer here, girl, in less than 24 hours.

0:07:27 - Noelle

And I do have an appointment set up with you, but not until April, and I keep checking for cancellations. But so someday we'll go into more detail.

0:07:37 - Julie

Yeah, yeah, what she's talking about. Everybody is get on my calendar whenever it's available and then on your confirmation email there's a little. You'll see a little button, a little tab that says reschedule. When you think about it, click on that, because people can get people reschedule all the time and oftentimes you can get in within a matter of a few days. I had a guy yesterday that was scheduled for next summer. He clicked the reschedule button and he got in within 24 hours of when he scheduled his original appointment. So it happens every week all the time. Just click that reschedule button and you'll be able to look to see when somebody has rescheduled and an earlier appointment opens up. Okay, what's your question?

0:08:26 - Noelle

Okay, so I'm working with a functional medicine doctor in the process of doing a heavy metal detox and a little bit of mold, and so I was gonna ask you if you would mind standing me to help release those metals out of my tissues and bones and get them out with along with. You know the protocol I'm doing and also I listened to one of your earlier podcasts today about a woman who had her explants and I had that done about nine years ago and she still had plastic in her body and if there's any of that still in my body, if there's any way to do a healing, yeah, okay, here we go.

0:09:08 - Julie

For those of you that are just joining us for the first time, how this works is I raise my vibrational level to the level of spirit, because we're all spirits attached to a body, having a human experience, and when we're attached to a body, we vibrate more slowly, simply because the body has mass. So I'm going to watch a laser beam come from my body here in Birmingham. It's going to hook into Noelle up in Madison, Wisconsin, and then I'm going to have a hologram of her in my mind's eye and it's going to be as if I'm looking at an X-ray or a CT scan or an MRI. Something will be identified and then, immediately thereafter, there will be some type of energetic healing that will begin, and I'm going to describe it in great detail. My analogies sometimes are really hilarious. So prepare yourself, Noelle. I may tell you your elbow looks like whipped cream or something crazy like that, but that is just how the images come into my head, and what I've realized over the years is that spirit giving us a frame of reference that will be understandable from a human perspective for this energy healing that we're doing.

So I want you to envision what I'm describing, Noelle. Everybody listening and watching. Please envision as well, because we're all going to be zapping on Noelle together. It's like the power of prayer the more energy, the more thoughts, the more prayer that's being put towards somebody or sent to somebody. It's always a wonderful outcome. It always benefits the person who's receiving that energy and those thoughts. So here we go. Here comes my laser beam from Sweet Home, Alabama, heading up to you in Madison. Okay, got you shooting energy

from your feet up to the top of your head. It's going to underneath your left breast first. Okay, so you do have some plastic in there. You do have a little mold in there as well, so I'm clearing that out. When the implants leak, oftentimes there can be mold that colonizes inside the body. Are you hearing that from your doctor?

0:11:19 - Noelle

Yeah, we are detoxing mold as well.

0:11:22 - Julie

Okay, perfect. So getting that removed, getting the rest of the mold? I don't see that much mold. I see some underneath your left breast. I see some a little bit on the kind of going up on the side of your right breast, like not quite all the way under your armpit, but as it makes that turn, you know, from underneath up to the right side. So I'm removing that as well.

0:11:48 - Noelle

I also had tingles under that left breast as well years ago.

0:11:53 - Julie

I'm so sorry. Yeah, that's so painful apparently. Yeah, yeah, so I'm doing that. We're doing a heavy metal detox too, Noelle, and that is two big U-shaped magnets that are joined in the middle around your body and they go up and down your body and they pull out metallic particulates. They can look like little specks of glitter, little sparkly specks, little dull specks. They can look like little strands of steel wool in a steel wool pad. You know that you scrub pots and pans with in the kitchen, and so these magnets that are joined in the middle turn a quarter of a turn all the way around your body. Okay, they've just popped off.

Now we're irrigating your body to be sure there isn't any metallic dust left in there. So we've got that going, and then I'm shooting energy from your feet up through the top of your head just to give you a little bit of a boost. But you're on the right track with that. Yeah, and I work with a lot of women who have their implants removed because there have been many problems from them. So there are a lot of women that don't have problems either. But I get to talk to women who've had them in for 30 years and I think they're supposed to last for maybe 10 if you're lucky yeah.

0:13:14 - Noelle

And I did it nine years ago. But this is my second round of heavy metal detox because I was on the pill, for I mean, there's amalgams in my mouth. I mean you name it.

0:13:24 - Julie

Okay, all right. Well, I hope you feel better. Thank you, you are so welcome. I look forward to having you for a whole hour. Me too. Okay, take care. Bye, Noelle,

Noelle
bye.

Julie

AskJulieryanshow.com. If you want to have a conversation with me, ask Julie Ryan on YouTube. We're doing the live stream. You can put your question in the chat. Remember to put your first name, where you're located and what your question is, and we will be answering some of those as well. So let's see who's next.

Hi, kim,

Kim
hi,

Julie
how are you my girl?

Kim
okay, I'm actually very close to you. I'm about a hundred miles west of you, right on the Mississippi line in Lamar County.

0:14:09 - Julie
Oh, great, in what city, Vernon, okay, terrific. I used to have a manufacturing plant in Amory Mississippi, so I was there today. I probably passed you many times, probably so.

0:14:24 - Kim
I actually used to work for a medical manufacturing company in Columbus, Mississippi. So anyway, I have a little connection with you. Anyway, I wanted to talk to you about my sister. She is, her name is Deanna and she lives in Louisiana. She's about halfway between Baton Rouge and New Orleans and a little town called Santa Ma and she is a massage.

She's a massage therapist and she has always been very shy. As we get older we learn that she's just an introvert, but when she is in a crowd she sometimes she gets overwhelmed. She says that she just, I think she's feeling everyone's energy. I think she's an empath and what has happened is that when she massages she does like medical massage and she's absorbing their pain And's. It first started when she was giving me a massage several years ago and I don't know whether we just have such an emotional connection.

I was very, I was in a lot of pain and I think she just absorbed it. Does that make sense? Have you heard of that happening before? Okay, and so what's happening is that she keeps absorbing, I think, her client's pain and it's becoming debilitating for her and this is her company and it's getting to where she can't work as much as she needs to and she's just. She's just in so much pain I feel so bad for and I was wondering if maybe you could scan her and see if there's something going on Not that, if it is an empath thing, maybe connect us with someone that can help her deal with it or maybe find a way to block it so that she's not absorbing this from her client, because she is such a wonderful massage therapist, she loves it, it's her passion and I just I want to help her.

0:16:26 - Julie
You could connect her with me, because I'm going to give you a trick for her to do, a technique that will help her, and she can watch this and she can hear it on her own.

When we're connecting, you know how you hear me say here comes my laser beam from Sweet Home Alabama to you in Mississippi, kind of a thing. What's happening is it's called a bioplasmic streamer. Physicists can measure this in a lab, in a physics lab. They can put somebody like me in there and they can measure the energy that I'm sending to someone, wherever it is, anywhere in the world or in a galaxy far, far away. You know, it doesn't matter. And so these bioplasmic streamers are. They're like cords. Have you ever heard the concept of he hasn't ever cut the cord, or she hasn't cut the cord from her father or her mother or whomever? That's what they're referring to and it's a real thing.

So every night, when I get in bed and I would suggest that she do this after every client, especially in the short run what I do is I pull out the cords. I'm pulling out those bioplasmic streamers, those energy cords that go from my solar plexus to yours or whomever's, depending on. You know whoever I'm talking to. And when they go out, I envision them as a laser beam. And when I pull them out, they look like a really thin umbilical cord. So I envision when I get in bed at night, before I do my gratitude things, I do gratitude things on all 10

fingers, you know my son, my husband, my family, blah, blah, blah, blah. And then on my right hand it's always stuff that's happened during the day that I'm grateful for, and then I say my prayers. But before I do any of that, I pull out those bioplasmic streamers from people with whom I've worked all day and also from people with whom I've interacted, like even in the grocery store or whatever.

0:18:31 - Kim

You're like visualizing, yeah, yeah.

0:18:34 - Julie

And I can feel them too. I can feel them. They just slide right out. There are some schools of thought that you can take your hand and go down in front of your body and cut the cords. I prefer to pull them out because if you're cutting the cords you're leaving part of somebody else's cord inside of you. Why do you want to do that? It doesn't make sense to me.

So I pull them out every night. I don't remember to do it during the day because I'm going and blowing so fast you know, going from client to client to client but I do it every night when I get in bed. It's the first thing that I do before I go to sleep. So have her do that In the meantime, have her schedule an appointment with me and we'll do a full, you know, cleanse of all of that. But she's just been doing it for a while, my guess, and she's got lots of those cords in her. I'm pulling them out of her right now while we speak, but I'd like to have extra time with her where we can really do a deep dive and get all those out. But tell her she's you know, that's to be expected because of what the work is that she does and because she's connecting with her clients so deeply.

0:19:45 - Kim

Could you do a quick scan on her just to see if there's anything else going?

0:19:48 - Julie

I just did, oh okay, I did, I did Okay, yeah, it's real easy. It's real easy. She just didn't know about the technique, or probably know about the cords, so all fixable.

0:19:59 - Kim

When the hurricane went through there a couple of weeks ago, she was taking her dog out to the bathroom and she slipped and fell on the steps and landed on her tailbone and that just jarred everything and she has been absolutely measurable.

0:20:13 - Julie

I'm sorry. Well, thank you very much. Yeah, have her schedule an appointment with me and then we can do a deep dive. Okay, thank you, and I'll work on all that other step too. Thanks, Kim.

Kim

Thank you,

Julie

you bet. Take care, Alrighty, everybody, if you want to have a conversation with me, askJulieryanshow.com, if you're coming in on the YouTube live stream, we're at Ask Julie Ryan.

Just put your question in the chat and you can put your first name and where you're located and what your question is, and we'll be answering those too. First name and where you're located and what your question is, and we'll be answering those too. Also, remember to subscribe to the podcast wherever you listen to it, and also on YouTube as well. Alrighty, let's see who's next.

Okay, Elizabeth, hello, I'm from California. My question is is it advisable to get extensive dental work? Is there anything I should know beforehand about the anesthesia? I've had bad reactions before and am concerned. Okay, Elizabeth, I'm going to connect to you in California and see what the spirits of beyond is. Jonathan, you say when he was little I could talk about him. Since he's helping us in YouTube tonight, I talk about him anyway, so it's all good, all right. So, Elizabeth, connected into you.

Is it in your best interest to have extensive dental work done? I get not all of it. I wouldn't do it all at once is what I'm hearing, Elizabeth. The other thing I'm hearing is to use IV sedation. The gas is not going to agree with you, is what I'm getting. So only have it done at an oral surgeon's office and they can use IV sedation. They take you back to the 60s, basically, and they call it twilight sleep. Be sure that they have a crash cart wherever you're going to have the surgery done. And I get space it out more. Don't have it. Don't have whatever you're having done all at once. You need to space it out more. Don't have it. Don't have whatever you're having done all at once. You need to space it out more. So I hope that helps. Good luck with all that. You're welcome. She said that she wrote thank you in the chat. Okay, I hope that makes sense to her. I guess it did.

All righty, here's another one from the YouTube. Let's see, this is Monica. Hi, Monica, good evening, Julie Monica from Vernal Utah. My husband, Jim has a disc in his neck that's pushing on his spinal column, causing a lot of issues. Can you help. He gave me permission, good girl. So she's watched the show. I won't scan anybody without their permission and I'll ask them telepathically because I just don't think it's right, I don't think it's ethical to scan somebody without their permission. So okay, here we go. I'm going to hook into you first, Monica, and then I'm going to hook into your honey, Jim. All right, got you, got, Jim.

Okay, I can see the disc. What I'm watching happen is I'm watching the vertebrae get pushed back into alignment with these little spacers they remind me of the spacers that a tile mason uses when he's laying tile, you know, before he puts the grout in, and that gets those vertebrae back in place. And then the disc is being pushed back in in between the vertebrae and then there's this little netting that's installed and think of a goldfish net, that's how fine it is and it stretches from the upper to the lower vertebrae and vertebra I guess vertebrae would be plural so from the upper to the lower, all right. And then there's a vortex spinning outside of his, the back of his neck, and that's doing the healing. There was a little bit of stem cell energy that was applied in there on that disc just to make it a little fluffier so that it stays in better, and discs look like those refreezable ice packs, those royal blue ones that you can get at the drugstore or at the doctor's office, the orthopedist's office, and so I'm watching that happen.

A chiropractor, I believe, can help. What I'm watching is I'm watching his spine get lined up, and what's happening, Monica, is there's a metal rod on one side of his spine. On the other side of his spine, his spine's been heated, like with a laser to make it pliable, and those metal rods are moving very slowly towards the middle and what that's doing is that's straightening out his spine. Looks like it curves a little bit to the left to me, so we're straightening that out, lasered again, and then that's going to solidify it. It's kind of like how a potter needs clay that's moldable in order to form a vase or a bowl or whatever they're creating, and then, when they're done, then they fire it in an oven to make it solid. That's a similar thing, and when the spine goes into place and those rods go in, they go into kind of a groove that reminds me of a sliding glass door or screen going out to a porch or a patio or a deck, and so that's what I just watched happen. Or screen going out to a porch or a patio or a deck, and so that's what I just watched happen. I believe a chiropractor can help him get aligned, which will help that disc stay in place. So I hope that helps.

Thanks for your question. All right, askJulierianshow.com. If you want to have a conversation with me, we're on the YouTube live stream at AskJulieRyanShow.com. If you want to have a conversation with me, we're on the YouTube live stream at Ask Julie Ryan. Hi Michelle, she says. Hi, Julie, thanks so much for all you're doing. It's Michelle, from Pennsylvania. I went to the hospital because of what you were able to tell me. Thank you so much. I'm in the healing side because of you. Oh, you sweet thing. I'm so glad that you're feeling better. Oh, my goodness, what great news. So you keep on keeping on, girl. That's wonderful. Thanks for letting us know. Hey, who are you? How?

0:26:38 - Mary

are you girl? Great, how are you? I'm so excited my first time. Welcome. Where are you located? Michigan, Southfield, Michigan. Yeah, terrific, well, welcome. You. Got a question for me? I do. This is about my cousin, very dear cousin to me Unexpectedly lost her only child December 2022. And then a few months later was diagnosed with lung cancer stage four. She's been undergoing treatment and been doing okay, but I'm just wondering if there's anything you can do to help her.

0:27:23 - Julie

Yeah, what's your name Mary?

Mary
Diane

Julie

Diane. All right, is she there, close by you?

0:27:29 - Mary

She's in Detroit, Michigan, near me.

Julie

Yeah Well, yeah, that's sort of near you.

0:27:35 - Julie

All right, what I'm going to do is I'm going to connect to you and then from you to Diane and I'm going to ask her permission if I can scan her. Certainly, if she says yes, I will. If she says no, I won't. Not all is lost, however, because we can talk to her spirit and get information that way. So my feeling about that is if I am scanning somebody without their permission, it's like I'm looking at their x-ray without their permission, which is, you know, which is a HIPAA violation. It's a privacy violation number one. But they may tell us what they want us to know and I don't have a problem with that, but I'm not looking inside her body without her permission.

0:28:17 - Mary

Like I say, it's an ethical thing.

0:28:20 - Julie

Does she know we're talking this evening? She doesn't. Okay, all right, here we go, I'm connecting into you and from you to Diane. All right, got Diane, Diane, I'm talking to Mary and she wants me to scan you energetically. He said, yeah, bring it on Whatever will help. That sounds exactly like her. That's what she said. That's what I heard from her. All right, so shoot energy from her feet and through the top of her head. Okay, so I can see the lung cancer. It looks like it's metastasized to her liver. That's the next area that I'm seeing. That's showing up on my radar.

So what we're going to do is we're just going to do the full cancer healing on her. First of all, all those areas where it's metastasized are being encapsulated, Mary, and then they're removed. So they get encapsulated first, because we want to contain those cells, we don't want them spreading. That's number one. Number two we're doing a lymph cleanse on her. Imagine there's a vertical oval tube, like a pneumatic tube at the bank, at the drive-thru. You know where you put that container in and it sucks it in.

You push the button, it sucks it into the bank building. So all her lymph fluid's going in there. It's in the front of her body, it's inside her body, but it's in the front and all her lymph fluid is going through that tube. And there's a hole that's opened on the bottom of each of her feet and that's where the toxins are coming out of. So lymph fluid, Mary, looks to me like an amber colored liquid, but it's kind of globby. Do you remember lava lamps back in the day?

0:30:04 - Mary
Yeah, sure.

0:30:05 - Julie
You know how that fluid's kind of globby. That's what it reminds me of, and so the fluid's staying in there, but the toxins are coming out the bottom.

And it reminds me of reverse osmosis purification. What they do to drinking water right, they keep the fluid, but they get the toxins out. This is a reverse osmosis purification of her lymph fluid, which is how the cancer spreads, is either in the bloodstream or in the lymph. So next what we're doing is there's a big metal dome that's come down on top of her and as it raises up it says extracting the lymph nodes that have sequestered toxins. They're doing their job.

Okay, lymph nodes look like little D3 vitamin capsules to me. When they have toxins in them, they can look brown or black inside, and so those as that dome lifted up, you know, like the dome that would be on a plate of food in room service in a hotel. That's what this reminds me of. So now she's being sprinkled with stem cell energy. Light amber colored gel has sparkles in it, of course, because it's woo-woo, gotta have sparkles, and it reminds me of Dippity-Doo hair gel back in the day when I was a kid in the 60s and 70s. It's a liquid, it's a gel, but it's kind of liquidy.

0:31:23 - Mary
I remember.

0:31:24 - Donna
You remember that.

0:31:27 - Julie
There are vortices above her head, beneath her feet, on either side, front and behind, all spinning concurrently. That's generating new lymph nodes, right? So we're doing that Now we're doing the heavy metal detox that we did earlier. Two big U-shaped magnets on either side of her joined in the middle, going up and down her body, pulling out metallic particulates and metallic strands, and then it turns a quarter of a turn until it gets all the way around her body. That's popped off, that's being irrigated out. All right, let's do a DNA healing.

Dna, of course, is the recipe that tells the cells how to behave. It's comprised of four nucleic acids. They're represented by four letters A, t, c, g. One strand can have 100,000 letters on. It can have a billion letters. A strand of DNA looks to me like a piece of paper you'd see inside a fortune cookie with a fortune written on it. And so what I'm watching, Mary, is she has eight strands that have come out of an X chromosome. You know, remember, girls have two Xs, boys have an X and a Y. You didn't think you were going to get a fifth grade science review tonight,

did you? I love it, but yeah, so those letters are being rearranged. Imagine that they're being re-sequenced if you will Like have you ever played Scrabble?

Yes, the word game. You know how you move a letter up and over to form a word. Yes, yes, that's what I'm watching. It looks like in a movie. You'd see computer code flying across the screen, but I'm watching these letters get rearranged and this works great. Those strands are being reconfigured back to a normal recipe. And then one last thing is she getting treated with chemo?

0:33:13 - Mary

She had been taking not IV chemo but pill.

0:33:18 - Julie

Okay, it was some newer type of Like an immunotherapy thing, almost, yeah, okay, which is kind of like chemo. It's kind of like chemo, okay. So have her watch this and have her envision when she's taking that medicine. Have her envision her body is in cryo, it's frozen, it's like blue, like those refreezable ice packs, and there's a column, there's like a tube, down the center of her body, and have her envision all the chemo going in there and so it does its job, but it doesn't ruin all the other healthy cells. In the meantime, and back in the day 40 years ago, plus 40 years ago, when I first started selling hospital supplies, we one of the products that I sold was a cold cap that people that were getting chemo would wear this ice black on their head.

0:34:14 - Mary

I had seen that before, yeah.

0:34:15 - Julie

And it keeps them from losing their hair because it's cold on those hair follicles and it keeps it from being damaged.

0:34:26 - Mary

I saw a lady on TV talking about her cancer treatment and wearing the cold cap so she wouldn't lose her hair. Absolutely Great.

0:34:34 - Julie

Yeah, and it works great. So I take it a step further let's just put the whole body in cryo when she's having chemo. If they want to do radiation on her, whatever. Put your body into cryo, envision those blue ice packs and then let that radiation or that chemo just go to the areas where it's needed. Excellent, okay. Best news, Mary, is she's not dying at the moment. Her spirit is in her body, otherwise I wouldn't be able to scan her.

0:35:08 - Mary

That is phenomenal news. I can't thank you. That is phenomenal news, I can't thank you enough.

0:35:13 - Julie

You are so welcome. Thanks for being so sweet and calling in for her. Appreciate it.

Mary

Oh my gosh, you bet.

Julie

All right, if you want to have a conversation with me, askJulierianshow.com. If you're coming in on the YouTube live stream, we're at AskJulieRyan. Just put your question in the comments and in the chat and we'll do that. So let's see who's next. Tina.

0:35:38 - Julie
Where are you, Tina?

Tina
I'm in Yellowknife? Canada.

0:35:43 - Julie
Oh, terrific. Well, welcome. Got a question for me yes.

0:35:47 - Tina
So when you scan someone who doesn't believe in what you do, when a person asks you to do it and the person doesn't know, do they know themselves? If you don't tell them? Like, do they sense anything? If their higher self says yes, do they know?

0:36:05 - Julie
Sometimes yes, sometimes no, I've had both. But we're talking with their spirit. When I'm asking somebody's permission to scan them, it's my spirit talking to their spirit. Yeah, and that's how that works. So it's not like we're trying to fool them and we're trying to sneak a healing in there. Okay, it'd be a good idea, but, again, I won't scan them. If they don't give me permission, I can, but I won't.

0:36:33 - Tina
Yeah, you have somebody you want me to scan, yes, so my son has bipolar and over the years I've tried very hard to convince him how he eats will really, really help him. He's a terrible eater. He says he doesn't believe in it, so I think he may have heavy metals in his brain, because I've read that that's a possibility when you have bipolar, and I was wondering if you could ask his higher self if you would allow him to scan him to see if there's anything you could do to mess in his symptoms or whatever that works.

0:37:10 - Julie
Yeah, yeah, absolutely. So what's his first name? Con, c-o-n. Con. Okay, yeah, all right, so here we go, comes to my laser beam. I'm going to hook into you first, Tina, and then I'm going to go to Con from there. Okay, got you, got him, con. I'm talking to your mom. He's already saying no thanks, oh, wow, before I even get the question out. But I do have a suggestion for you, okay, and that is do an internet search and look up Chris Palmer MD.

Christopher Palmer, p-a-l-m-e-r MD. He is head of psychiatry at Harvard, has been there, I think, for 30 years and he is all over on interviews and is talking about how he's a psychiatrist and his patients are some of the sickest of the sick. He's got some patients that of mental illness have been on disability for decades, unable to work, you know, unable to have what we would say normal society kind of a life by getting them on a ketogenic diet. So you're on it, mom, but by getting them on a ketogenic diet, it, mom. But by getting them on a ketogenic diet he's gotten 90% of them off all of their medications. He's gotten them returned to work and returned to normal society. And he said it not only alleviates the symptoms, but it heals their brains and he's done lots of research on it.

So you're just the mom to Khan, you know you're not an expert on this, but if he hears it from somebody who's one of the foremost experts in the world on this and you can send him multiple links of Dr Palmer saying this it may resonate differently with him, but Dr Palmer says that only 10% of his patients are helped with pharmaceuticals. He said 90% of his patients are not only helped, but they're healed with a ketogenic diet. And he goes on to talk about how we have over 100 years worth of research on the ketogenic diet, because it's been used to stop epileptic seizures in children and it's been studied for over 100 years. So that would be. My

suggestion is look up several of those interviews and links and send them to Khan, because he's going to be hearing it from an expert and not from somebody who he doesn't believe you know is an expert and you're not. Yeah, although you're right on it.

0:39:55 - Tina

Although you're correct. Do you know why his spirit said no, I don't.

0:40:00 - Julie

Okay, no, he was saying no before I even had the question in all the way you kind of expected that didn't you.

0:40:06 - Tina

Yes, I did, I just try. I just I'll just give it a try. Anyway, you never know.

Julie

Yeah, Chris Palmer, look him up.

0:40:14 - Tina

Oh, thank you so much,

Julie

you bet. Thanks, Tina, take care.

Tina

Okay, bye-bye, bye,

Julie

alrighty, we've got time for a few more questions and then I'm going to announce the winner of the free session. So you want to stay tuned for that, because you may be the winner. I get to hear from people that have won and when I get them on my sessions and I get a whole hour with them every once in a while, they'll say oh, I was driving to work and I heard my name and I just was screaming in the car because I never win anything, but I won this, so it was really fun. So, if you want to have a conversation with me, ask Julieryanshow.com, if you're joining us on the live stream on YouTube, we're at Ask Julie Ryan. Remember to subscribe, remember to share this with your family and friends and then call in sometime and maybe you'll get chosen and we can get your questions answered. Okay, Chris, who do we have next? We've got somebody from YouTube. Okay, who do we have next?

We've got somebody from YouTube. Okay, Tatiana, hi, Julie Tatiana, from Roanoke, Virginia, could you please connect to my dog and ask her how she's feeling?

Can she see? Okay, her name is Misha. Thanks so much. Okay, Tatiana, here we go. Comes to my laser beam from Sweet Home, Alabama, heading over to you in Virginia. All right, got you. Okay, Misha, what's going on Looks to me like her left eye vision.

I'm looking through her eyes from behind her head, like going through her head, looking through her eyes. Looks to me like the left eye is very cloudy. Does she look as she's developing cataracts? When we see that on animals, their eyes, their lenses in their eyes can look kind of iridescent and that's how you know that there's some cataracts going on. So what I'm doing, Tatiana, is I'm just removing that lens. You know when I say eye, it's spirit working through me and with me to help facilitate healing. So I'm watching that lens get removed it looks like a contact lens and then I'm watching a new lens get inserted and then there's one little stitch on the outside corner of her left eye and the right eye's got some cloudiness, but it's not as much as the left. So we're just going to do the same procedure there, so pulling out that

lens that looks cloudy and then putting a new clear lens in there and one little stitch on the outside of her right eyeball and hopefully that will help her see easier and better and she'll be good to go. So I hope that helps.

Thanks for your question, all righty. Oh, by the way, my training in Atlanta November 1st through the 3rd we're at the Kempton Hotel and if you can't spend the whole weekend with us for the training, at least come join us for the Ask Julie Ryan Live on Friday night, and we're going to be doing this show live there and anybody can come. And then we're going to have a dessert reception in this crystal ballroom. That's fabulous afterwards and I'd love to give you a hug. So if you can come join us because you live in Atlanta or you live close by come join us on Friday night the 1st of November for the Ask Julie Ryan Live, and then Saturday morning on the 2nd and then on Sunday the 3rd is when the Angelic Attendant Training happens. But if you can just come and join us on Friday night, that's great too. Love to have you. So keep that in mind. Bring a bunch of your friends, you know just like. Come in a big, I don't know, get red, a suburban or something. Bring all your friends and it'll be a blast. We'll have a great time. So come join us. Okay, Chris, who's next?

Adriana Hi, going there. All right, heading up to Massachusetts from Sweet Home, Alabama.

Rosario Rosario's in phase seven of the 12 phases of transition. What that is for those of you that haven't heard me talk about this yet is, as we're dying, we're surrounded by angels and the spirits of deceased loved ones and pets, and as we progress towards passing that configuration of those beings, angels and spirits and pet spirits changes, and so we can connect into somebody and we can see, based on that configuration, what phase of transition they're in. So a couple of things. First of all, there are three questions I always ask when somebody is dying. Number one are you ready to go? She's saying yes. Are you in pain? She's saying yes. What do you need? Saying yes, what do you need? She's saying her teeth cleaned. That's an interesting response. Does she need her teeth brushed? Or does she have dentures that she needs cleaned and she needs them put into her mouth? I don't know, but she'd like her teeth cleaned. That's an interesting response. Okay, so there's that, and you can go to askJulierayan.com and go to the 12 phases of transition tab and there's a graph graphic there with illustrations of all 12 phases and what I would suggest is download that chart. It's free. It's a free download. Save it on your phone and then just ask in your head or aloud what phase of transition is my mom in? You'll hear a number in your head fast as you can snap your fingers and then you can refer to the chart.

So anybody that has a loved one at the end of their lives, that's a really good way to be able to monitor where they are in their passing and I find that it's very convenient because people are taking time off work. Sometimes they're traveling vast distances to come be with their loved one at the end and that just helps you navigate that journey. The other thing is my book Angelic Attendance what Really Happens as we Transition From this Life Into the Next. If you'd like a free copy of it, just go to Julieryangift.com. Julieryangift.com and we'll send you a free digital and audio book download and please share that with your family and friends and it's going to give you a lot of comfort. It's also going to help you navigate what's going on with your mom. So anybody that's lost a loved one can benefit from it. Anybody that has a loved one nearing the end of their life can benefit and really frankly, we're all going to be there someday, and so are our loved ones. So go to Julieryangift.com and then you can get a free copy and share it with your family and friends.

All righty, let's do the free drawing. So, Chris, can we have a drum roll please? There he goes, love that. I used to do it on the desk. This is way better, Chris, thanks. Okay, this is from somebody named Karen, and Karen on YouTube is at Jet6110. So, Karen at Jet6110. She says it's so cool how accurate you are. Honest to goodness, you were so accurate about everything I asked you. Love you, Julie, Karen. So Karen must have called in to one of our shows. So,

Karen at Jet6110, if you go to AskJulieRyan.com and you click on the Ask Julie button on the homepage and just send us a note and say, hey, I'm Karen, I want a free session, then we will coordinate my calendar and yours and I'll get you for a whole hour, girl. So I'm looking forward to that and congratulations.

If you want to enter into the drawing, I give away a free session each month. All you have to do is leave a comment, leave a review wherever you listen to, podcasts or on YouTube. You can even leave a review on Amazon for any one of my books, and so we choose from there. Excuse me, and then later in the month I'm going to give away a free class. So, in order to do that same thing, leave a review on YouTube and also subscribe. So those of you that are listening on podcast when you get in front of a computer or when you're stopped and you can go on your phone, go to Ask Julie Ryan on YouTube, subscribe and leave a review on YouTube, because we only choose from YouTube for the class, but we choose from all the comments on the free session. So we'll see who the winner is later in the month. But congratulations, Karen.

All righty, Chris. Who's next? Brianna? Hi, Brianna,

Brianna
hello,

Julie
hi, how are you?

Brianna
Good, This is actually for my mom,

Julie
hi mom, what's your name?

0:50:07 - Donna
It's Donna. We've spoken a few times. I've had some sessions with you.

Julie
Yay, where are you?

Donna
I am about a half hour outside of Philadelphia, in Pennsylvania.

0:50:18 - Julie
Terrific, Well wonderful. It's so lovely to see your beautiful face.

0:50:23 - Donna
Thank you, same to you.

0:50:24 - Julie
Thanks, you got a question for me.

0:50:27 - Donna
I do so. In May I had an angiogram procedure done and it caused me to have a stroke.

0:50:37 - Julie
Oh geez.

0:50:38 - Donna

And 10 days later I had a brain hemorrhage. Oh honey, yeah, it's been rough. So I was in the ICU and whatnot, but anyway it caused me to lose my vision Okay, you know whatnot, but anyway it caused me to lose my vision and they put me on a medication that I was kind of taken down abruptly and it's caused me severe withdrawal. So it's been a heck of a ride. I was just wondering if you see any improvement in my vision, any improvement at all actually, how are you feeling now, other than your vision?

Well, fortunately, fortunately, my limbs were okay. I didn't lose any mobility in any of my like my arms or legs or anything like that. But I lost an entire my left field cut in both eyes of my vision and it affected my macula. They said that possibly it could come back. Not, it will never come back fully, but you know it could improve. They don't know. It's really unclear, um, but the medication that has caused me severe withdrawal, um has been. It's debilitating mentally and physically, so that's also caused me problems.

0:52:04 - Julie

Okay, all right, let me get you on my radar and we're gonna. We're gonna go to there. And when they say your vision most likely won't come back, that's just somebody's opinion. You can show them right. Yeah, always keep that in mind. That's somebody's opinion. The body has a tremendous capacity to heal and I have seen miraculous healings in all areas of the body over all these years I've been doing this work. So I was talking to somebody recently who was given a very dire diagnosis and I go well, guess what. You just may show them right. They're doing what they believe is best, you know, based on what their experience is. But the body has a great capacity to heal. So here we go.

Here comes my laser beam from Sweet Home, Alabama, heading to you up near Philadelphia. All right, got you. So it's going to your eyes. First. I'm in your left eye and imagine if your left eye is made out of jello. All right, imagine I'm taking a spoonful of that eye out in the middle. Spoonful of that jello. That is the eye and it's leaving a divot. So imagine now that there's stem cell energy going in there and the stem cell energy is a light amber colored gel, has sparkles in it reminds me of Dippity-Doo. How many times have you heard me say that?

A lot and there's a vortex spinning, yeah, outside of your left eye. That's regenerating your eye on the left side. Is your left eye worse than your right? Yeah, by any chance it is. Okay, that's where the energy went first, so that I was just following where it was going. Okay, let's do the right eye. Same thing Not as much of a scoop coming out of the right eye, but the same thing.

Imagine it's jello coming out of the right eye, but the same thing. Imagine it's jello. Imagine there's a spoonful coming out in the middle. There's stem cell energy going in there. Light amber color gel sparkles, dippity-doo. There's a vortex spinning outside of that.

This stem cell energy, Donna, is the absolute coolest stuff ever because it'll regenerate any body part that we need, and I have watched it regenerate whole organs before that show up on subsequent scans and it freaks out the doctors. That's hilarious when that happens. So that's number one. And if you think about it, if you go back to your grade school science lessons, we learned, every cell has a nucleus. Every nucleus is surrounded by cytoplasm. Cytoplasm is a watery gel like dippity-doo, and our bodies have a centrifugal force in them that spins, that causes the cells to divide and replicate to the tune of billions of them a day.

What we're doing in this healing is we're watching that happen. We're just watching it in warp speed. Now the healing is going to integrate into your body and all healings are this way, all energetic healings that can happen instantly. It can take days, weeks, months May need some kind of complementary care, like surgery or different you know, prescriptions or glasses or whatever. But it's always our spirit's choice of how we integrate the healing. It's always the spirit's prerogative of how that healing happens. I'm also in your brain right now. I'm looking at

where the stroke was. I can see where it has clotted up. Did you have an interventional radiology procedure done with the little coils to help it clot?

0:55:36 - Donna

Um, I know. So after I had the stroke I had, um, they put me on blood thinners. So, after the after that, 10 days later, is when I had the hemorrhage, and what they did is they gave me um platelets to uh, coagulate. Yeah, Okay, I me platelets to coagulate.

0:55:54 - Julie

Yeah, okay, I can see where it coagulated. So a lot of the time interventional radiologists will put these little hair thin, tiny little coils, copper coils in there and that'll coagulate it. What it looks like is it looks like a glob of coagulated you know blood cells in there. So I'm encapsulating it. I spirit working through man with me. We're removing it and what we're doing is we're rotor-rootering those neural pathways in there. So imagine there's a little tiny corkscrew that's inside those tubules in your neural pathways.

Neural pathways look like laser beams that are part of a security system. You know that crisscrosses a room, maybe in a museum or in a home or in an office building, and so yours were impeded by the stroke. Removing that glob of dried up tissue and blood from the stroke, we're regenerating those neural pathways in your brain, which I believe is going to help your vision come back as well. So there's a vortex spinning outside of each eye, in front of each eye, and there's one spinning above your head for your brain to help that go. Okay, your neuropathways just all lit up. It's like turning on the laser beams, so they lit up. I believe your vision is going to come back. Thank you, Julie. I believe it's going to come back. You may need glasses, but what the heck?

0:57:27 - Donna

I don't care about that. I'll wear a lot of glasses, but it's been very difficult emotionally.

0:57:34 - Julie

So I bet, I bet I'm so sorry You're on the mend. You're going to heal from this.

Donna
Okay,

Julie
thanks for calling in.

Donna
You're welcome. Okay, bye,

Julie
bye, let's see, looks like we got one more. Hi Pat,, hi girl, how are you?

Pat
I'm good

Julie
Pat's a graduate of my Angelica Tendon training. You guys so so nice to see you, my girl, how are you?

0:58:02 - Pat

I'm good, I'm fine, I'm from Iowa. Again, I'm calling my daughter, jenny, who's spent my handicap. She appears at the care center to be experiencing some pain, just based on

screaming and stuff when she is moved at all. Can you scan her and see if there's anything going on?

0:58:24 - Julie

Yeah, because she can't tell us yeah, and it's so hard to scan somebody that you're really close to yeah.

0:58:30 - Julie

It's always you know. You learn that in my class.

0:58:33 - Julie

I always say. I always say you, you want to have one of your colleagues do this, because when you're really close to somebody, a lot of the times you can't, you can't get a good read or you don't trust what you get. I I'm already connected into her, pat, and what I'm seeing is that it looks like low back, sacral, like you know, low back area. So I'm watching an energetic chiropractic adjustment on her. She's got she may have a bulging disc it looks like on the left side and a lot of inflammation. I've gotten that calmed down. Is she complaining about her low back? Does she point to her low back or any of that?

0:59:13 - Pat

She's not able to do that. All she's able to do is pretty much scream when she's moved.

0:59:20 - Julie

Yeah, so what I'm doing is I watched a chiropractic adjustment happen. I watched what we did earlier with another collar where those vertebrae were propped up. Disc is put back in that little netting from the upper to the lower vertebrae are going, it's going in place, got that? I'm watching a like a belt almost Think of an inner tube, of a cold pack that's being wrapped around her whole mid section in the lower back, and so the front of it doesn't have any cold in it, but the back does. Imagine that there's a belt in it. It looks almost like it's got pockets in it that you can put refreezable ice packs in it and that's going to help bring down the inflammation with her. So I believe that's what's going on and hopefully this will help with her. Okay, believe that's what's going on and hopefully this will help with her.

Okay, yeah, Alrighty. Well, good luck with all that. Yeah, okay, honey, love seeing you. Bye, thanks, okay, bye-bye, alrighty, everybody. That's it for this week. Wow, that went fast, as it always does. So remember to share this with your family and friends, remember to subscribe and call in next week if you have a question and, in the meantime, sending you lots of love from Sweet Home Alabama. Bye, everybody.

1:00:45 - Annncr

See you next time. Thanks for joining us. Be sure to follow Julie on Instagram and YouTube at AskJulieRyan, and like her on Facebook at AskJulieRyan. To schedule an appointment or submit a question, please visit AskJulieRyan.com.
