

## AJR Show Feb 27th Transcript

0:00:01 - Annncr

Julie Ryan, noted psychic and medical intuitive, is ready to answer your personal questions, even those you never knew you could ask. For more than 25 years, as she developed and refined her intuitive skills, Julie used her knowledge as a successful inventor and businesswoman to help others. Now she wants to help you to grow, heal and get the answers you've been longing to hear. Do you have a question for someone who's transitioned? Do you have a medical issue? What about your pet's health or behavior? Perhaps you have a loved one who's close to death and you'd like to know what's happening? Are you on the path to fulfill your life's purpose, no matter where you are in the world? Take a journey to the other side and ask Julie Ryan.

0:00:43 - Julie

Hi everybody. Welcome to the Ask Julie Ryan Show. I'm so delighted you could join us this evening. It's where we blend spirituality and practicality to help you live a life of purpose and joy. And I have to break out into song. I'm so excited that I just can't hide it. All right, we're giving away. You want to stay on for the show? Because later on I'm going to give away the absolute biggest thing I've ever given away. Hands down, no contest. You're going to want to be involved with this, so I'm going to announce it a little bit later in this show and, who knows, I may sing for you again. You just never know what. You're going to announce it a little bit later in this show and, who knows, I may sing for you again. You just never know what you're going to get here.

Thursday nights are always so much fun. We've got Chris on the main dashboard and we've got Samantha over at the YouTube live stream helping everybody. So if you want to have a conversation with me, I'm at AskJulieRyanShow.com. If you want to have a conversation with me, I'm at AskJulieRyanShow.com. If you want to come through on the live, then you just put your first name and where you're located and your question in the chat and we're going to be taking questions from both the on-camera and the chat people. So gang's all here. Team's in place should be fun.

You know I never know who's calling. I don't. Team's in place should be fun. You know, I never know who's calling. I don't see who's in line, I don't know who they're going to put through. So I kind of feel like I'm on a you know game show crepshoot thing every week which makes it so fun because I never know who's calling. I never know what their question's going to be or what spirit's going to say. By the way, I never know what their question's gonna be or what spirit's gonna say. By the way, I have an extra happy mommy. This week. Our son Jonathan was in town for a few days. He was in Atlanta on business and stayed with us for a few days before he had to fly off elsewhere. So if I seem extra joyful, it's because I am, because His Majesty the one and only Prince Jonathan was home for a few days. Now I just have to change his bed and wash his towels and stuff like that. But it's all worth it. All right, Chris, who do we have first? Okay, hi, Julie, this is Elaine in Portland. Hi, Elaine, I would really appreciate it if you would do a medical scan on me and address my cancer and the block in my colon. Absolutely, I'm so sorry you're going through that, Elaine, in Portland.

How this works for those of you that are new to the show is I raised my vibrational level to level of spirit. I learned how to do this, you guys. I didn't wake up as a kid with people, ghosts chasing me or spirits chasing me. I learned how to do all this stuff and I'm going to watch a laser beam, Elaine, from my body here in Birmingham, Alabama. It's going to hook into you in Portland and then I'm going to have a hologram of you in my mind's eye and it's going to be as if I'm looking at an x-ray or a CT scan or an MRI, so I'll be identified. Immediately. Thereafter there will be some type of energetic healing. I'm going to describe it in detail. So I want you to picture what I'm describing. Everybody listening and watching. I want you guys to picture it as

well, because we're all going to be sending healing to Miss Elaine and that's how it works, and sometimes my analogies are really funny and I don't really try for them to be. It's just how they come into my head and they're intended to give us a human frame of reference for all this energy healing work that we're going to be doing. So here comes my laser beam from Sweet Home, Alabama, heading up to you in Oregon. Got you shooting energy from your feet up through the top of your head.

All right, so I'm in the colon right now. It looks to me like part of your colon is being energetically removed. It's a diseased part, and then what we're going to do is we're going to replace it. So imagine there's a piece of PVC looking pipe you know the pipe that they use for plumbing and it's being placed where that section is that was removed and then we're going to put stem cell energy in there. Light amber colored gel sparkles Reminds me of Dippity-Doo hair gel when I was a kid in the 60s and 70s. If you don't know what Dippity-Doo is, you can look it up. They still sell it and there's a vortex spinning outside. I'm looking at you from behind, Elaine. It's outside of your back and it's regenerating that colon tissue. In the meantime, imagine there's a corkscrew that's spinning through your whole colon and it's basically rotor-rooting your colon. It's just cleaning out your colon and then it's being flushed. It even just went through the new part that was generated and it's being flushed out. And then there's stem cell energy going in your whole colon just to give it a tune-up. Light amber color gel sparkles dippity-doo that vortex is still spinning outside of the colon. Sparkles dippity-doo that vortex is still spinning outside of the colon.

Now, Elaine and everybody, how this works is the healing's happened on the energetic level. Now it's going to integrate into your body. That can happen instantly. It can take days, weeks, months may need some kind of complementary care, like change in diet, surgery. You may have to have a colon resection. All kinds of other things can happen as far as on the physical side.

But it's always up to you, it's always up to the person's spirit of how they integrate the healing, or whether or not they even do integrate the healing, because it's always based on what you want to explore in this lifetime, what your spirit does. So, when you think about it, nobody heals anybody else. Your child can have a cut on his finger and you put a Band-Aid on it. Well, you don't make his skin grow back, he makes his own skin grow back, and that's just a real simple analogy for how this works, so I hope that helps. I hope you feel better. Thanks, Elaine. If you want to talk to me, askJulieryanshow.com, and we're on the YouTube live stream at Ask Julie Ryan and we'll be taking questions from both, so let's see who's next.

0:07:21 - Julie  
Hi, Janet.

Janet  
Hi, I'm getting a little emotional,

Julie  
oh how are you, my girl?

Janet  
I'm good.

0:07:30 - Julie  
Good, where are you

Janet  
Outside of Chicago?

Julie

Okay, why are you emotional?

0:07:35 - Janet

I didn't know if I'd be picked and it's my first time calling in.

0:07:43 - Julie

I guess God had plans for us to chat. I think so too. Here we are, yeah.

0:07:48 - Julie

Yeah. How may I help you?

Janet

So I have a really good girlfriend. She has pancreatic cancer. Oh my Okay. She went through phases of gosh I'm drawing a blank. Treatment, treatment, her treatment, and then they basically told her she needs to go to Austin, Texas, and see if they can get her to be a candidate for a trial. And she's not.

0:08:20 - Julie

Okay, what's her first name?

0:08:24 - Janet

, her name's Sandy.

0:08:27 - Julie

Okay, and is Sandy there in Chicago, with you, near you in Chicago? Yes, she's near me, yes, okay, all right, what I'm going to do is I'm going to connect into you, first Janet, and then from you to Sandy, and I'm going to ask her permission if I can scan her. If she says yes, I will. If she says no, I won't, I can, I can, I could. That was a combo could, can, I can. My brain was ahead of my mouth. She would agree. She told you that she would. Okay, great, and it's an ethical thing with me. I'm not going to scan somebody without their permission, ever, even if it's an ethical thing with me. I'm not going to scan somebody without their permission, ever. Even if it's a fetus, I won't even do that. Now, animals, I can. Animals always say yes, I don't worry about that. But I think it's an invasion of privacy, somebody's privacy, without their permission. So I ask them telepathically. So I'm going to ask her. Here we go. Here comes my laser beam from Sweet Home, Alabama, heading up to you in Chicago. Got you going to Sandy? Sandy, I'm talking to Janet. May I have your permission to scan you? She says oh, yes, oh, yes, okay, here we go. She's not dying at the moment. Her spirit is in her body. So that's the first thing I want you to hear she is not dying at the moment. So I'm going in and I've got the hologram of her in my mind's eye. Looks to me like she's got some metastasis. Have the doctors told her that? Yeah, that's what I'm seeing. Janet, when I see metastasized cancer it looks to me like picture a white dairy cow with black splotches on it. That's what the cancer looks like. It's the black splotches and I can see it in different parts of the body.

So we're going to just do a lymph cleanse on her Big pneumatic tube oval, vertical. All her lymph fluids in there it's spinning and it's cleaning out the toxins. It's like reverse osmosis purification, like they do with drinking water. You know you get a Dasani or an Aquafina bottle of water and it says reverse osmosis purified. That's what we're doing with her. Her lymph fluid it's coming out the bottom of her feet, the toxin. She has a hole that's open on the bottom of each foot. Now there's a big dome that's come down on top of her metallic dome. Think of the dome that you see on a plate of room service food in a fancy hotel when they deliver it to your room and as it lifts off it's pulling out all the lymph nodes that have sequestered toxins for her.

And lymph nodes, Janet, look like little D3 vitamin capsules to me, and when they have sequester toxins they can look brown or black inside. So now those have been removed, I'm watching her get sprinkled with stem cell energy and this cracks me up. You know, good Catholic girl, there's this thing that the priest uses at the holidays and it sprinkles holy water. They walk through the aisles and they sprinkle holy water on people in the congregation. That's what the stem cell energy gets sprinkled with Cracks me up every time I see it. So that's happening.

We're regenerating new lymph nodes, vortex above her head, beneath her feet, on either side of her front and behind, all spinning concurrently. And then now we're doing a heavy metal detox on her, Janet, two big U-shaped magnets on either side of her joined in the middle. They go up and down her body and they pull out metallic particulates. They can look like little sparkly pieces of glitter, little dull pieces of glitter. They can look like a little strand of steel wool from a steel wool scrubbing pad you'd use in the kitchen, you know, to clean pots and pans and then, as those magnets go up and down, then they turn a quarter of a turn until they get all the way around our body. So they just finished.

Now we're going to do a DNA healing, and DNA, of course, is the recipe that tells the cells how to behave. A strand of DNA looks like a piece of paper you'd see inside a fortune cookie with a fortune written on it, and it's comprised of four nucleic acids represented by four letters A-T-C-G. One strand can have 100,000 letters on it, can have up to a billion letters on it. I'm watching those letters get rearranged. So what we're doing is we're returning her DNA back to a normal recipe. You didn't expect a sixth grade science update tonight, did you? A science review?

0:12:59 - Julie  
on DNA. But you know, it's just how it comes in.

0:13:02 - Julie  
So she has seven strands of DNA that are being reconfigured right now. They come out of an X chromosome Because, remember, girls have two Xs and boys have an X and a Y. You know, back to the sixth grade again, and so we're doing that. Is she being treated now? Or have they told her they can't do anything else for her and for her to go to Austin?

0:13:26 - Janet  
No, she already went to Austin and they couldn't treat her there. So she came back home and they're trying to figure it out what the next steps are Okay.

0:13:37 - Julie  
Two things I want you to and have her watch this so she'll be able to hear this on her own and it'll help integrate into her body. Number one there's a book called Radical Remission Radical Remission I want her to read that. It's about people who were sent home, that the doctors couldn't do anything else and it ended up. These people are 10 years out cancer-free and this author went through the whole world and talked to people from all walks of life, all education levels of that, and there are ten common denominators that help the people heal their bodies and seven out of the ten were spiritual. So that was really interesting.

I interviewed a gal associated with the Radical Remission Project. Her name's Carla Means Giroux. So if you do a search on Ask Julie Ryan, Karla with a K, k-a-r-l-a you'll see that episode. I would suggest that Sandy watch that. That's number one.

Number two my favorite cancer researcher is a guy named Thomas Seyfried S-E-Y-F-R-I-E-D. He's at Boston College and he's been studying cancer for 30 years. He's a no-nonsense kind of guy. He's my favorite that I've ever heard and he says the two biggest thing to remember is no sugar and nothing fermented nothing fermented. Cancer cells have to have sugar or

fermentation and sugar can be absorbed in the form of anything processed bread, crackers, pasta, anything refined low on the food chain. If God made it, eat it. If man made it in a factory, do your best to avoid it, kind of a thing. So hopefully that'll help.

Yeah, I think it's really encouraging that she's in her body and after that DNA healing was just finished. When I just scanned her before I let you go, she doesn't have any black spots on her anymore. When I just scanned her before I let you go, she doesn't have any black spots on her anymore. So the healing's happened, the healing's done. Now it's just got to integrate into her body and she's the only one her spirit and she are the only ones that can integrate it. But she's already healed on the energetic level by spirit working through me and with me and everybody listening, and you too.

0:16:05 - Janet  
Bless you.

0:16:06 - Janet  
Thank you so much.

Julie

You are so welcome. Thanks for joining us. You're a sweet friend. Thank you, alrighty. Okay, remember, stay with us. I've got a big announcement, a big giveaway. You're going to want to hear about it. So, in the meantime, if you want to have a conversation with me, askJulieryanshow.com. If you're coming in on the YouTube live stream, we're at Ask Julie Ryan and Samantha's over there. Just put your first name and where you're located in the chat and you can put your question in there and, like I said, my Samantha's there to help you whatever you need.

Okay, Captain Chris, who's next? Hi, Ian.

0:16:53 - Ian  
Hello Julie, Can you hear me?

0:16:56 - Julie  
Yes, sir, I can. Fantastic, how are you this evening?

0:17:01 - Ian  
I'm very well. Thank you very much for asking. A little bit nervous, yeah, Julie, could you possibly, and I'd really appreciate it.

0:17:16 - Julie  
I'm calling from Oxford, England. Okay.

0:17:18 - Ian  
It's the middle of the night it is, and could you possibly scan me please? Because I've been having a heart process for the last two and a half years and it started in Bali after lockdown. During lockdown I got stuck there for quite a while and after my spiritual teacher passed away, I suffered heart failure and it may have been a broken heart syndrome. I don't know if it's the doctors who figured it out. And then, obviously, when I came back to England, I tried to heal naturally, but I ended up going to hospital and they gave me lots of drugs for heart failure. I tapered off from the drugs, left it behind and my heart corrected itself. And then in January I got very overwhelmed with stress and energetically I could feel it hitting my heart and I ended up with heart fibrillation. I think it is.

So another stretch in hospital for a few days and they gave me more drugs. I've naturally just left the drugs. It hasn't been a stress or a strain. The fear mongering hasn't worked. I believe in natural healing. I believe the body can heal with all my soul. I know it can. You're right, I do. My heart's getting better and I still have fibrillation. I know it's an energetic process for me, everything is I guess.

Yeah, yeah, I was just wondering if you could scan me and please try and assist me to get back to where I was. But I know it's opened my heart more. I've become more sensitive and more caring and, I think, a little bit more emotional. To be honest with you, I know it's opened my heart more. I've become more sensitive and more caring and, I think, a little bit more emotional to be honest with you.

0:19:10 - Julie

You know what All heart patients are more emotional People after they have a heart attack, people that have bypass surgery, have open heart surgery. That's one of the common symptoms post-op is they're way more emotional. There is something about it opening up the heart.

0:19:27 - Julie

So let me connect into you.

0:19:29 - Julie

Yeah, let me connect into you, Ian, and I'm going to get you on my radar. We'll see what's going on with that ticker of yours. There we go. Here comes my laser beam from Sweet Home, Alabama, heading across the ocean. All right, got you shooting energy from your feet up through the top of your head. All right, I'm looking at you from behind. There's a hologram of you in my mind, so I'm looking at you from behind. You've got some blockage. It's not totally blocked, but you've got some blockage on the left side, your left side, my left side, as I'm looking at you.

So we're just going to clean out your whole cardiovascular system. All right, imagine it looks like a network of tubing and imagine inside that tubing. The tubing reminds me, Ian, of aquarium tubing and sometimes it gets gunk inside of it. You know, just dead cells and cholesterol. Not cholesterol, but plaque and stuff like that Cholesterol we all need lots of cholesterol. That's a whole different story. So what's happening is there are corkscrews that are inside your whole cardiovascular tubing system and they're spinning in there, cleaning it out, and then we're gonna irrigate it. I'm seeing a stent put in on the left side. So in that one artery got that going. That's open. A stent looks like a little tube that goes in. That holds that open. You know that pathway open for the blood to come in and out of the heart. So I watched that get installed. All right. So all that's been ground up, you're being irrigated from the top of your head through the bottom of your feet. The irrigation fluid comes flying out the end of your toes. Imagine your feet look like sprinklers. It's hilarious when I see that. So it's coming out the end of your toes. Now here comes the stem cell energy light, amber color, gel sparkles, dippity-doo, and you have vortices spinning above your head, beneath your feet, on either side of you, front and behind, all spinning concurrently. Your heart lit up. It became brighter. It was kind of gray, looking in Now it's pink, but we're going to do an ablation on you too. I'm being led to do an ablation. So imagine this will get you back into sinus rhythm. Imagine there are little electrodes put in the front of your heart, on the perimeter, on the front side of your heart, and imagine there's an electrical current that's running clockwise from electrode to electrode clockwise, counterclockwise, clockwise, counterclockwise. I'm watching it go back and forth. It'll go back and forth for a few seconds here. Clockwise, counterclockwise, clockwise, counterclockwise, clockwise. Going a little bit counterclockwise, okay, clockwise, counterclockwise. All right, you're done. Oh, I know you're done, Ian, as the electrodes pop off and they just evaporate, they just disappear. So your heart is now back in sinus rhythm.

What you can do when it's out of rhythm and you probably are a meditator, if you've been in Bali for a long period of time, I would imagine so, yeah, meditation is great. In the meantime, if you're driving or you know you're someplace where you can't just pull aside and meditate I want you to do the four, seven, eight, breathing All right. In for four, hold it for seven, out for eight, do that 10 times in a row. What that's going to do is that when you have heart palpitations, it makes you nervous and you go into a fight or flight response which exacerbates it. That's going to keep you out of the fight or flight response. It's going to help get your heart regulated. Works like a charm every time. So I think you've got lots of mileage left on that heart.

0:23:25 - Ian

Thank you so much, Julie. I really appreciate it. I really do. There's a lot I want to do in the world, so bless you, terrific.

0:23:32 - Julie

And thank you to your guides. Well, thank you for getting up to talk to us.

0:23:35 - Ian

I will get up every time just to listen to you. I really do. Thank you so much, bless you.

0:23:43 - Julie

Okay, all righty, ask Julie Ryan show.com if you want to have a conversation with me, and I'm at. Ask Julie Ryan on the youtube live stream. If you don't have a copy of my book angelic attendance what really happens as we transition from this life into the next and you want a free digital or audio book version, go to Julieryangift.com. Julieryangift.com will send you a free copy. It has illustrations in it that show what happens when somebody is dying, how we're surrounded by angels and the spirits of deceased loved ones and pets, and share these links with anybody and everybody you want, because this information, I think, is so important and we're all gonna lose somebody that we love at some point and, heck, we're all gonna be there someday. So it takes the fear out of it, gives it a glorious component, and everybody needs to know this stuff. I think it needs to be taught in the schools. That's why I give thousands of these away. So, Julieryangift.com, if you don't have one yet, all righty, remember to subscribe. Thanks, Chris. Chris is leaving me a note. Remember to subscribe, remember to hit the you know the notice bell, for when we have a new show, I have wonderful, wonderful, wonderful guests that I get to interview, and when you listen to this show it's always fun on Thursday night, but the interviews are really fun too, because you're gonna learn a lot, and we always blend spirituality and practicality. That's kind of our motto around here at the Ask Julie Ryan Show. You can be doing the woo-woo, but you gotta make it practical so you can integrate it into your life, and that's what we aim to do, so join us for those as well. Also, remember to leave a review wherever you listen to the show. We're on all the podcast networks or on YouTube. Remember to subscribe on YouTube if you're listening all the podcast networks or on YouTube. Remember to subscribe on YouTube if you're listening to the podcast. Next time you're in front of a computer, just remember to go and subscribe and leave a review, because we choose people for a free session with me, valued at 750 bucks. That's next week. You guys, I'll announce that who the winner is this time, because I do it every month. And then also there's a free Angels in Enlightenment training class that I give away every month, so we pick those from the reviews. You can leave a book review, too, for any of my seven books at Amazon, and we choose from there too. So easy to do, worth great prizes. I love giving away prizes, giving away a big one in a little bit.

Julie

Okay, Chris, who you got next? Oh, ewa, e-w-a. Hello, Ryan. Hello, yes, I love your show and it's my first time to watch you love. Well, thank you, sending you big kisses and hugs back. Thanks for watching Fun. That's what I'm called by some of my friends Jules or Ryan. Hey,

Ryan, okay, Dana McCarthy. Hi, Julie, love spending my Thursday evenings listening to your show.

Will you do a scan on my husband Doug's right shoulder and send him healing? Doug is in Manhattan, Illinois, absolutely, all right, here we go. Here comes my laser beam from Sweet Home, Alabama, to Illinois. Okay, got you. I'm going over to Doug, Dana,, Doug, I'm talking to your lovely wife. May I scan you energetically? He goes. Okay, you don't believe it, but that's fine. He's humoring you, which is great. Okay, going in.

It went to his shoulder, went to his left shoulder first. You say his right shoulder is hurting, but it went to his left shoulder first. So I'm going to go there first, Dana, and see what's going on. Sometimes the energy goes to the opposite side of the body and we reinforce it when it's doing the heavy lifting if the other side is not feeling well. And after all these years and all these tens of thousands of scans, I just follow where the energy goes. So let's see what's going on on the left side. All right, I'm watching a chiropractic adjustment happen on his left side. I'm watching he's straining his left side.

I'm watching stem cell energy get injected into his left shoulder as well just to kind of lube it up. I don't see anything torn. All right, let's go over to his right side. He's got a little rotator cuff tear. I don't know if he's been to the doctor yet, but it's in the. It's like in about the 1230 position on the face of a clock, between the 12 and the one, and it's a little tear.

So what I'm watching, as I'm watching it gets stitched up energetically, there's a bunch of stem cell energy. You know that's the stuff that gets used all the time because it regenerates any body part we need. And that just came in for me about six or seven years ago when stem cell healing became something that the medical industry was starting to talk about. And boy, it's used pretty much in every healing that I do. It's just amazing. It'll regenerate whole organs when needed, that show up on subsequent scans, and that's really fun when that happens. Okay, so God, that stem cell energy is being put on top of it. There's a vortex spinning above his shoulder. It will heal on its own. Surgeons like to operate on it and it's you know. It's a good outcome either way. It just depends on what he's willing to go through.

One of my dear girlfriends, fell, is willing to go through One of my dear girlfriends fell. She just shattered her whole shoulder, her right shoulder, and she tore her rotator cuff. It was so bad they couldn't even do surgery on her. And you know what the whole thing healed. I met her at the emergency room. Her husband called me. I met him down there when they arrived and we worked on her. And you know what? She has full mobility. She didn't have any surgery, she had a little bit of physical therapy. But five years later she has full mobility, her joint is back, it's healed, her rotator cuff is healed. She has no pain. So what Ian said is true the body has the capacity to heal anything and everything. So hope that works for Doug too. Thanks, Dana, appreciate you joining us. AskJulierianshow.com. Ask Julie Ryan on the YouTube live stream. Just put your question in there and your first name and where you're located, like Dana did, and then we'll be taking questions from both places. Okay, let's see who

Chris has next. Hi, Wendy, How are you?

0:31:03 - Wendy

I'm good, thank you. Can you hear me?

Julie

Yes, ma'am, where are you?

0:31:09 - Wendy  
I'm in Toronto,

Julie  
oh terrific. How are things up there?

Wendy  
Colder than I'd like, but it's February still.

0:31:20 - Wendy  
I'm done with winter, but I'm done with me.

Julie  
There you go. Do you have a question for me?

Wendy  
I do. I have an elderly dog, golden Retriever, and she has arthritis pretty extensively through all of her joints and also, I've been told, a tumor growing in her stomach or her abdomen. And I wondered if you could maybe give her a scan and if there's anything you can do to help,

0:31:47 - Julie  
yeah, what's her name Wendy.

Wendy  
Her name is Kelsey. She's a golden retriever.

0:31:51 - Julie  
Kelsey yeah. All right, and how old is Kelsey?

Wendy  
13 and eight months, nine months, something like that.

0:31:59 - Julie  
Wow, wow. My daughter-in-law, Rr Mal, the vet, always says age is not a disease. So I always say well, how old is the dog she's like? Age is not a disease. Thanks, mel, she says that about humans too, but she's right. So I'm going to connect into you, Wendy, and then from you I'm going to connect into Kelsey. And so here we go. Here comes my laser beam from you know where, sweet home Alabama, heading up to you in Canada. I got you going to Kelsey. All right, it went to her stomach first. Let's see about the tumor. It does not look malignant to me. It's pink. So I'm encapsulating it, Wendy, and we're going to remove it. That's out right now. A little bit of stem cell energy is going in just to kind of clean up things a little bit.

And now what I'm watching is I'm watching her whole skeleton get taken out of the top of her head. And it's as I see this with humans too, arthritis looks like this white crunchy calcium stuff. Like if you have a battery that's expired in a flashlight, you know it gets that white crunchy stuff on it. That's what arthritis looks like inside the joints of humans and animals and that's what it looks like on the monitors in the operating room. I'm an inventor of orthopedic surgery devices sold throughout the world and former manufacturer of them, and so on those monitors, I've been in there on a bazillion joint scopes over my career and that's what it looks like. So of course, that's how it appears to me, because that's my frame of reference. So have you ever gone through the car wash where they have those big turnstile things and they used to have brushes on them that would clean your car, but now they have strips of fabric that clean your car so it doesn't scratch the paint. That's what I see happen.

As the skeleton comes out of the top of the head, you see these big turnstile brush things and it's brushing all that white crunchy arthritis stuff out of her joints. And then she's being dipped into a big vat of stem cell energy light amber color gel sparkles, dibbity-doo Her skeleton's. Back in her body there are vortices spinning above her head, beneath her feet, on either side of her front and behind, all spinning concurrently. That's regenerating her joints. Arthritis normally comes from the gut, even with pets, so I would check into her food. You know what you're feeding her all of that. And then also about three weeks ago I did a show with a vet and I think that would be one that you wanna listen to. If you just go on [askJulieRyan.com/show my show page](http://askJulieRyan.com/show/my-show-page) and you go through it a little bit, you'll see that there's a show with a holistic vet and you'll learn a lot about the care for your dog. So hopefully that'll help.

Wendy

Can I ask one more question?

Julie

No,

Wendy

about her.

Julie

No, because I need to get other people on.

Wendy

okay, thank you so much,

Julie

schedule an appointment and then we can do a deep dive and then we'll be able to talk more about her. Okay, I'm just trying to get as many people on as possible.

Thanks, Wendy.

Wendy

No, I get it. Bye, I appreciate it.

Julie

Alrighty, that sounded a little abrupt, no, but you know, yeah, let's get somebody else on.

Okay, Chris, who you got, who you got for us. I didn't mean it to sound abrupt.

Hi, Jerry, where are you?

Jerry

I'm in New Jersey, new Jersey, o

Julie

kay, terrific, how may I help you?

0:35:45 - Jerry

Well, I have a question regarding my mom. She's 90. She has an issue walking and we don't know whether it's physical or mental.

0:35:58 - Julie

Okay.

0:35:59 - Jerry

And also she doesn't want to eat. She eats very little.

0:36:04 - Julie

Does she have any other medical issues or she's just having trouble walking? And is it a new development or has it been going on for a while?

0:36:11 - Jerry

Well, it's been going on for a while. She has other issues as well.

0:36:17 - Julie

Other issues like physical issues, dementia issues, what.

0:36:22 - Jerry

Physical issues. She quite frequently gets stomach aches from eating. I don't know because the stomach aches from eating, I don't know, regular food,

Julie

what's her name?

0:36:32 - Jerry

Her name is Cecilia,

Julie

Cecilia. Okay, all right, I'm going to connect into you. I'm going to ask her telepathically if I can scan her for her permission. If she says yes, I will, if she says no, I won't. You probably heard me say that earlier, so here we go. Here comes my laser beam from Sweet Home, Alabama, heading up to you in New Jersey. Got you going over to Cecilia. Your mama Got her. She's in phase three of the 12 phases of transition. So do you know what that is? Have you heard me talk about that?

0:37:07 - Jerry

Yes, yes, I do.

0:37:09 - Julie

Okay For those of you that don't when somebody is at the end of their life, their spirit exits through the top of the head and it holds on. It looks like a cartoon caption bubble and then the person's, loved one's spirits come in and she's surrounded by angels and lots of other spirits, jerry, and so when somebody's spirit is out of their body because they're in the phases of transition, I don't get a read on them from a visual standpoint, because the spirit's the power source for the body. It would be the equivalent of my trying to look at an x-ray in a pitch black room without any electricity. So when somebody is dying, I always ask them three questions. Let's ask them to your mom, Cecilia, are you ready to go? She says I'm getting ready. She said I'm getting ready, all right, are you in pain? Yes, some of the time. What do you need to say goodbye to my family? Is all her family there in New Jersey with you, or are some located elsewhere.

0:38:16 - Jerry

No, they're located all over the place.

0:38:18 - Julie

Okay, are they like all in America? Are they all over?

0:38:25 - Jerry  
the world, some in Europe, some here.

0:38:31 - Julie  
All right. So the ones that are there, I would ask them to come visit her. The ones that are abroad, you can get them perhaps on a Skype or a FaceTime or a Zoom call so she can see them and she can talk to them, and not necessarily to say goodbye and not necessarily to say goodbye, but just so she can see them and she knows that they're thinking of her and she gets to see them before she leaves. Does that make sense? Yes, it does Okay. Have you read my book Angelic Attendance yet, or listened to it?

0:39:09 - Jerry  
I downloaded it. I didn't get the chance to read it yet.

0:39:11 - Julie  
Okay, listen to it. It's about maybe three hours on the audio book and it's going to give you a lot of information. It's going to give you a lot of comfort as you go through this. 90% of people at the end of their lives, Jerry, see the spirits of deceased loved ones and pets. During the transition process that can last six months to a year in some instances. So if she starts talking about seeing deceased loved ones, she's not hallucinating, she's actually seeing them, and same thing with pet spirits. So keep that in mind as she's going through that and then look for little miracles along the way, because they'll be plentiful. Does she live with you? No, she doesn't. Okay, where is she? Is she in a senior living place or no? No, no, she lives by herself, she lives by herself.

0:40:09 - Jerry  
She doesn't want to accept that. Any help.

0:40:11 - Julie  
Okay, well, all you can do is just honor that and then just check in with her and then, if she's deteriorating, you may want to call hospice in to help with her. And then also one other thing if you go on my website, askJulieryan.com, Jerry, and you go to the 12 phases of transition page, there's a chart with all the different positions that the angels and the deceased loved ones are in. Download that chart and save it on your phone because it's going to show you all the different configurations, configurations, and then you just ask in your head, what phase of transition is my mom in? And you'll hear a number and then you can refer to the chart. So I say, put it on your phone, because you can ask anywhere you don't have to be with her and you'll hear a number in your head. It's the first thing that comes in your head and then you can refer to the chart. So I hope that helps.

Jerry  
Thank you,

Julie  
you're welcome. Thanks for joining us. Good luck,

Jerry  
Thank you very much. Bye-bye, you bet.

Julie  
Oh gosh, it's so hard.

But that phases of transition chart, you guys, it's so helpful. I've lost track of how many people tell me that they've used it when they had a loved one at the end of their lives and it's just so helpful. If you see your loved one going through a phase like six, seven, eight in rapid succession. Get that family in there to say goodbye. Those that are able to come say goodbye if need be. And people, once they're in the phases of transition two, they can move around, they can come out, they can be at eight, they can come back to four, but most of the time and I would imagine this will happen with Cecilia you'll see them progress. You know phase five, six, seven, eight. So I talk about all of that in the book Free download, Julieryangift.com, and you'll get a digital and an audio book version. I send both because the digital version has the drawings in it, which really helps you understand the different phases, and it has amazing stories that are so heartwarming and you're gonna enjoy reading them.

So, all righty, who else do we have, Chris?

Let's take one more caller before my big announcement. Chris, get your drum roll ready, okay, Linda? Hi, Linda, from Southwest Washington. I'd like to ask about my youngest brother and my relationship, if you see it improving. I hear no, not anytime soon.

So all you can do is send them love and picture how you want it to be. Picture yourself with him having a good time, you know, maybe going for a walk on a lovely day or going out to dinner or something like that. And that's all you can do when you're estranged from somebody. Just send them love and see what happens. That's it. It's really more for us than for them when we send them love, because they see things differently than we do, obviously, and it helps us just go on with our lives in joy when we send them love and send them peace and joy and all those good feelings. So I hope that helps.

Linda, I don't edit anything I get from Spirit, obviously, because who am I to decide what you need to hear? Because who am I to decide what you need to hear? I'm just the messenger and so, as you can tell, I don't edit anything. Sometimes, when I have a client on the phone, they'll say okay, now don't hold back on anything. I say I won't. I mean, I'm kind about how I deliver the information, but if I'm getting the information, spirit wants it conveyed and I'm the translator. Chris, let's do one more, one more caller. If we've got one, Please, here we go.

0:44:22 - Bibiana

Hi, hi, hi. What's your name? I'm Bibiana and I'm in Spain.

0:44:27 - Julie

Hi Bibiana. God, this is an international show tonight. Wonderful, it's the middle of the night for you too. Girl, a little bit, oh my gosh.

0:44:39 - Bibiana

I'm so honored that you're up late, no, that you do this work, and thank you for opening up this space. It's amazing, you bet. So there's a lump in the left side of my thyroid and it was biopsied and they say, apparently it's starting to have odd cells, okay, and there's also like smaller lumps around it that are also becoming hard, or something like that. So of course, the doctors say you have to take the entire thyroid gland out, and I said I don't think so. Because the TSH are correct. I mean, everything is okay. So, and I'm on a cleansing diet already. I started about a week and a half ago and I just wanted to get a little bit of your magic to see what's going on.

0:45:31 - Julie

Yes, ma'am, here we go. Here comes my laser beam from Sweet Home, Alabama, heading to you in Spain. You know, we've got to ask Julie Ryan Espanol. We've got a YouTube channel. That's all in Spanish. All my shows are dubbed in Spanish and we have it in Portuguese and in

German, and soon to be French. So we've got English, Spanish, Portuguese and German. So tell your Spanish speaking friends which I'm sure you have many, who don't speak English that well, tell them that they can watch the show, everybody listening. If you have friends that are German or Portuguese, or soon to be French, we'll have that too.

Certainly. Yeah, okay, got you Got a hologram of you, Bibiana, is. I'm looking at you from behind, I'm going in. Yeah, you got some crunchies on there. It's kind of like barnacles, you know, on a boat, a ship. So imagine there's a I do see one nodule on there. It's pink. It's not malignant, based on what I'm seeing.

So imagine you know those cheese slicers that just have a handle on them and a thin wire. I watch that get used all the time around the thyroid because it slices, it cuts them and it cauterizes them at the same time. So I'm watching that electrified cheese slicer thing that's going around your thyroid and it's, you know, like a potato peeler. You move the potato around and you peel it off the peel that's what I'm watching happen, all right. And the nodule that's on there, that's pink same thing. It gets sliced off, it gets cut and cauterized Same thing. So got that going on.

Now we're giving your thyroid a tune up. There's a spiral of energy, Bibiana, and it's think of the Milky Way galaxy a kind of a spiral, all right. And it's spinning clockwise and it's just cleaning out your thyroid. So it's going to the right as it comes around on the right side, underneath and up the left side. It's throwing off this kind of sludgy looking stuff and as it does, the thyroid is getting pinker by the moment. So it starts at the top and then the pink tissue starts coming in. It's almost like it's draining the toxins and then the pink, healthy thyroids coming back. I always watch that. Okay, couple of authors you can check out for thyroid. One is a doctorate of pharmacy and then the other one is Kelly Brogan, k-e-l-l-y, brogan, b-r-o-g-a-n-m-d, and they both cured their own thyroid with diet. So, yeah, so your thyroid looks pink and healthy, with no crunchies on it anymore, no barnacles.

0:48:37 - Bibiana

Thank you so much. You are welcome. I feel stuff there. I'm very sensitive, so it feels like what's it feel like?

0:48:44 - Julie

Does it feel like it's kind of tingly or what?

0:48:47 - Bibiana

Yeah, it's like yeah.

0:48:50 - Julie

Yeah, there you go. So those of you that are watching she's got her hand up there and it's like she can feel electrical stuff going on in her throat. So that's what we're doing. But, yeah, thank you so much. You're going to be just fine. You go back to bed. Sweet dreams, Thanks for getting up late.

0:49:07 - Bibiana

I'll wait for your message, your next thing that you were going to say, that.

0:49:12 - Julie

I can't wait. Okay, here we go.

0:49:15 - Bibiana

Thank you so much.

0:49:16 - Julie

Okay, Chris, drum roll, let's do that.

Okay, here's the deal. You guys, my angelic attendant training we're going to do a class in May. It's going to be online, it's going to be live over the weekend, may 18th and 19th, and my angelic attendant training class you learn how to do the whole buffet of psychicness. You can talk to your deceased loved ones. You can talk to anybody that's deceased. You can talk to anybody that's alive telepathically. You can scan pets, you can do energy healing, medical stuff, you can do past life stuff, you can talk to your spirit guides, you can tell how close to death somebody is, and everything that involves any kind of woo-woo. You know woo means source in Taoism, so woo-woo, I love that term and it just means spiritual stuff. And remember, I learned how to do all this stuff. So angelic attendant training comes with nine practice groups a week, different days, different I mean a couple on the same day, obviously, when I only have seven days but comes with nine practice groups a week. You can choose any or all of them to attend. That's where your skills really ramp up and they're free for life. So you take the class and then you got practice groups and my angelic attendant training. We call it AAT, my AAT group. Everybody's been through. We're getting ready to do class number 23. They all participate and it's an amazing community that's super supportive.

So I am giving away a free scholarship, a full scholarship worth \$2,500,. You guys to a lucky winner. And here's what you do to register. Now I'll take the banner, Chris. And here's what you do to register. Now I'll take the banner, Chris. Okay, so you just go to askJulieryan.com slash class AskJulieryan.com slash class, and there's a form there you fill out it's got your name and your email and that kind of stuff and write us a little note about why you want to take the class and what's going to happen. I don't choose the winner on this one. You guys, my graduates, are going to choose it and they are going to be reviewing every application that comes in. We're going to start accepting them this evening, which is the 27th of February. It's going to go until St Patrick's Day, march 17th. I picked that day because it's easy to remember. Happy St Patrick's Day on March 17th. So we're open for two weeks. We will take any and all applications. If you want to scholarship, a full ride to my Angelica Tenant training class, just go to askJulieryan.com slash class and then my graduates are. We got this whole system set up. You know, I'm an entrepreneur, I'm good at setting all this stuff up and they're going to get to choose who the winner is. So the \$2,500, I wanted to mention something about that.

When I first started teaching this class, it came because one of my clients in South Africa actually I was talking with her and her family and her mother-in-law who was in a coma, and there were like six people on the phone and we were talking to grandma who couldn't communicate and afterwards this gal said can you teach me how to do this stuff? I said I don't know. I didn't think about it. Yeah, maybe. And so I talked to my spirit guide, pope Clement, and I said am I supposed to teach this stuff? He said yeah, and I said well, I don't know where to start. What do I do?

He said you do this, this, this, this, and he said you announce it on this date, which was 10 days from when I was making this conversation, when I was having this conversation with my client and her family, and I said I can't do it that fast. I gotta write a lesson plan, I gotta get a website page up. I mean I'm giving him all these reasons. And he said yeah, yeah, yeah, yeah, just do it. And he said that's when you announce it. And he said and it's \$2,500. And I said nobody will do it. And he goes oh, yeah, they will. I said why \$2,500? And he said that's the price. And it's been \$2,500, whether it's in person or whether it's online. He tells me not to change it. So I told him. I said nobody's gonna sign up for this. He's like yeah, yeah, yeah, yeah, just do it. So my webmaster was available. We did. We announced it on Thursday night on the Thursday night show. The webpage was up on Sunday.

By the following Tuesday, less than 48 hours later, I had 11 people sign up from four countries and pay the \$2,500. And I said to Clement okay, I give up. You know you tell me to do something. All right, I'm just going to do it. So that's how all that came about and in all these years, in 23 classes, I've never changed the price because he tells me to leave it there and it's kind of like something that keeps on giving. You learn how to do all this stuff and then there's free practice groups for the rest of your life and we get together once a month for anybody who's a graduate that wants to, and it's an amazing community. So just wanted to give you a little bit of to and it's an amazing community. So just wanted to give you a little bit of that background of how this all came about.

Angelic, attendant Training it will enhance your life in every way, every way. Just go to askJulieryan.com forward slash class and submit your application and we're gonna choose one. And also, you know, I'm going to announce it on the probably the first or second show of April. We'll announce it early and if you're thinking about taking the class, you can sign up for it. And if you win the scholarship, I'll give you a refund. So that's askjulieryan.com slash class and I'm so excited to offer this. It's the first time we've ever done it and you know, oh my gosh, whoever wins it, your life is just going to be enhanced in unimaginable ways. So good luck to everybody. Go ahead and get your applications in. All righty, Chris, do we have time for one more person? Maybe I?

0:55:56 - Julie  
think we do. Hi Susan,

Susan  
I can't believe this. How are you? Hi Julie, I'm excited.

Julie  
I'm excited too.

Susan  
I cannot believe this. I thank the angels for allowing me to get to speak with you.

Julie  
Wonderful, where are you Right now?

Susan  
I'm below Austin, Texas, but I am originally from Columbus, Georgia, pine Mountain Valley,

0:56:21 - Julie  
close to me., in Alabama. Well, terrific, well welcome. I thank the angels for getting you on too, and Chris and Samantha too, because they're my angels, they're my show angels.

0:56:33 - Julie  
How may I help you?

Susan  
My husband, in 2013, was told he had a tumor as big as a bulec in his prostate. We worked on him for a good year doing natural remedies. We cleared him up and we feel like, by the diagnosis of two different doctors, have said he is done with the cancer and he had to use catheters. And that's the one area we haven't really been able to conquer.

0:57:07 - Julie  
Okay.

0:57:09 - Susan  
So I didn't know if you could send any healing love, and magic to him.

0:57:13 - Julie  
Absolutely, Susan what's his first name?

Susan  
Caleb

Julie  
Caleb, all right. And is he using a catheter with a bag, or is he doing a straight cath just when he needs to go to the bathroom? Straight cath, yeah, all right, all right. So what that means to those of you that don't know, you've got. If you see somebody in the hospital and they've got a catheter in for urine, it'll hook into a bag where it will drain. A straight cath is they put a tube in themselves. It's self-administered in the bathroom and that's how they drain the urine out of their bladder.

So what I'm gonna do, Susan, is I'm gonna connect to you and from you to Caleb. So here we go. Here comes my laser beam from Sweet Home, Alabama, heading to you in Austin. Got you shooting energy from your feet up through the top of your head, and now the laser beam's going from your chest over to Caleb. Caleb, I'm talking to your lovely wife. Yes, she is lovely, yes, you are Okay. May I scan you energetically? He's saying, yes, absolutely Okay. So here we go. What we're going to do is we're going to go in.

I'm looking at him from the front, the hologram that's him in my mind. So I'm going. It looks to me like the muscle tone has atrophied and that's what's going on with that. It's not. Does he leak if he doesn't have the catheter? Does he have incontinence issues, or he just can't go? He just can't go without a catheter. Okay, so it's like that muscle's worn out is what it looks like to me. So I'm watching a spiral of energy spin inside his bladder, Susan, and we're just cleaning it out, because you know, I got him on my radar and mine's well, while we have him as a captive audience, right. So got that spinning. There's a little corkscrew going down his urethra and that's going to help tune that up too. So the muscle fibers look like they're just. Did you ever have a pair of pants or shorts that had an elastic, had an elastic, had an elastic waist on it and the elastic kind of wore out and it wouldn't? Wouldn't spring back, it wouldn't stretch anymore, it was just stationary.

That's what his muscles look like to me so what I'm watching is I'm watching there's a mold of a. It looks like a ring and the stem cell energy is going in it and it's going to regenerate those muscles in there and it kind of imagine the muscles are around his urethra and then this ring of muscles is going inside the ones that have lost their elasticity, for lack of a better analogy, if you will. So I'm watching that get put in place. And then I love this I see this on cervixes. When I'm working with a woman and I'm working on her cervix.

You know that packing tape that has that really tough string in it, the strands that makes it extra tough, extra strong packing tape. I see that string and it does this crosshatch pattern almost like imagine like chicken wire, but it's more crosses instead of the octagons in chicken wire and I'm watching that in the muscles and it's getting put in there so it's gonna be able to work the muscles better. So I've got that vortex spinning in front of them, so I've got that going. So hopefully that will help. Congratulations to him and to you with getting him healed. Great example of how the body has the capacity to heal.

1:01:06 - Susan  
Absolutely yeah, oh Julie, thank you a thousand times

Julie  
you are so welcome and give him our love.

Susan  
Okay, I will. We're excited. Thank you so much.

1:01:18 - Julie  
Thanks Susan, take care. Thanks for joining us. All right, everybody At [askjulieryan.com](http://askjulieryan.com) slash class  
Go, put your application in if you want to join us for the Angelic Attendant Training in May 18th and 19th. It's worth \$2,500,. You guys, it's a heck of a giveaway and a heck of a prize. So go ahead and do that and hope to see you there. All right, in the meantime, sending you lots of love from Sweet Home Alabama. We'll see you next time. Bye, everybody.

1:01:53 - Annncr
