

AJR Show May 29th Transcript

0:00:01 - Annncr

Julie Ryan, noted psychic and medical intuitive, is ready to answer your personal questions, even those you never knew you could ask. For more than 25 years, as she developed and refined her intuitive skills, Julie used her knowledge as a successful inventor and businesswoman to help others. Now she wants to help you to grow, heal and get the answers you've been longing to hear. Do you have a question for someone who's transitioned? Do you have a medical issue? What about your pet's health or behavior? Perhaps you have a loved one who's close to death and you'd like to know what's happening? Are you on the path to fulfill your life's purpose, no matter where you are in the world? Take a journey to the other side and Ask Julie Ryan.

0:00:43 - Julie

Hi everybody, welcome to the Ask Julie Ryan. Hi everybody, welcome to the Ask Julie Ryan show. It's where we blend spirituality and practicality to help you live a life of purpose and joy. We got a whole bunch of people waiting on the YouTube live stream. If you want to join us there, join us at Ask Julie Ryan on YouTube. We've got Samantha over there that's going to help people.

If you have a question, please put your first name, where you're located in your question in the chat and we'll be taking questions from there. And then if you're coming in on the AskJulieRyanShow.com and you're on camera Also, just Chris is over there. He's handling that and you guys know I never know who's calling, I never know what their questions are and I never know what spirit's gonna be, so it's always fun to see who they put up for me. Remember to subscribe, remember to leave a comment about what you think about the show either. Wherever you listen to podcasts we're on all the networks and on YouTube as well, because then you are entered into a drawing for a free session with me and also a free class with me, and we give away one of each every month. Also, if you have a question, you know, be sure and go to AskJulieRyan.com and you'll see a button that just says Ask Julie. You can put your question in there, because I answer questions every week there and it's a really good way to get your question in and I choose one each week. And be sure and subscribe over there at AskJulieRyan.com to my blog, because they're wonderful questions and wonderful answers that, if I say so myself, that come up and come in from spirit. So subscribe wherever you listen to the show, go to AskJulieRyan.com, subscribe to the blog there there's more questions answered over there and remember to ring the bell on the YouTube and on the podcast so you'll be notified when we send out a new show. All right, Chris, I'm ready Enough. Public service ads here, all right, hi, Chris, I'm ready Enough. Public service ads here, all right, hi Julie, this is Diana from Hopewell, pa. Hi, Diana, would you be willing to scan my 13-year-old Pomeranian pup, of course, who has CHF I'm assuming that's congestive heart failure and Cushing's, and do a healing if possible? She's still lively, but I worry about her Absolutely. Diana.

For those of you that are joining us for the first time, how this works is I raise my vibrational level to the level of spirit, because we're all spirits attached to a body, having a human experience, and when we're attached to a body we vibrate more slowly, simply because the body has mass, excuse me. So here we go. I raised my vibrational level. Here it comes. Here comes my laser beam from Sweet Home, Alabama, Diane, it's coming up to you and PA got you going from you to your baby girl.

All right, got her Shooting energy from her feet up through the top of her head. Her spirit's out of her body, honey, I am so sorry to tell you. This Doesn't mean she's going to die anytime soon, but in an animal or a human, when the entity is dying, the spirit leaves the body through the top of the head and it hangs on, kind of looks like a speech bubble in a cartoon where the

character's thoughts or words are housed. And so, Diana, your puppy's spirit's out of her body, which means I am not able to scan her because the spirit is kind of like the power source for the body and it would be the equivalent of me trying to look at an x-ray in a pitch black room without any electricity. But we can talk to her and see what she has to say.

So are you ready to go? No, not yet is what she's saying. Are you in pain? She's saying yes, she is at times she's in pain. She's saying it's not constant, it's intermittent is the word that I heard. And then what? Do you need more time with my mom? So she wants more time with you. How will your mom know when it's your time to go? I'll let her know. Do you want to be euthanized? When it's your time, she's saying she'll let you know. She hasn't decided. So I'm sure that's not what you expected to hear. But as you know, Diane, I don't edit anything I get. I'm the messenger from spirit. So I hope that helps. I hope that gives you some information that can help. Thanks for your question. It's so hard, you know, with our pets, with anyone we love, whether it's a human or a pet. It's just. It's so hard.

But this information can normally help us because it's guidance for us to make decisions on things like if we have a loved one who's dying and they're in one of the 12 phases of transition.

That's what my book Angelica Tenens is about. That's what my book Angelica Tenens is about what happens as we transition from this life into the next. And if you want a free copy, just go to julieryangift.com and we'll send a free digital and or audio book version, and it's in Spanish too. So those of you that are listening in Spanish, we've got both digital and audio versions for you for free. So it has graphics in it that show what the different phases look like and it'll give you lots of information. And when people are going through the phases of transition or when pets are, it helps give us information that lets us know when we need to bring people in who want to be with them at the end, because oftentimes families travel and they're taking time off work and all of that. So if you want a free copy, just go to julieryangift.com and we will send you one. Okay, Chris, who's next? Hi, maureen, hi.

0:07:26 - Maureen

Julie, how are you? I'm well. How are you, girl? I'm good. I'm here with my sister and I don't want to move it too much. I'll bring her into picture in a minute. Hi, Stacey, and we're calling in for my sister. She has stage four. It started out as tongue cancer. She has stage four. It started out as tongue cancer and it has metastasized to her lung. They do not know the cause. She has no risk factors and she did chemo and radiation and it didn't seem. We didn't get the outcome we wanted, so she started on an investigational drug. We didn't get the outcome we wanted, so she started on an investigational drug which consists of T-car cells getting infused and also cetuximab, and that has shown success. We are seeing a 50% decrease in her tumors.

0:08:20 - Julie

Good girl.

0:08:21 - Maureen

Yes, and we would like to see if you could do a medical scan and energetic healing on her please. Yeah, yeah, what's her name? Her name is Kathleen. Hi, Kathleen, and where are you guys? We're in right outside Philadelphia, Pennsylvania.

0:08:40 - Julie

Okay, and who's older?

0:08:43 - Maureen

I am, she's my younger sister. So she's been probably talking for you your whole life, right, Kathleen? And she's still doing it now. It's hard for her to talk because she had 70% of her tongue removed. I'm sorry, I figured that.

0:08:58 - Julie

But I was just teasing her and saying you've been talking to her probably your whole life anyways, so I figured she could shake her head yes and no, right, so she's still talking for you, right, girl? Okay, all right. So what we're going to do is I'm going to connect into you, Kathleen, and then we'll do a healing on you. So here we go. Here comes my laser beam from Sweet Home Alabama heading up to you in Philly, and everybody listening and watching, whether you're doing it right now, as we're doing this healing, or whether it's five years from now. You know, time doesn't exist in the spirit world. Time's a human creation. So we're all going to send a healing to you, Kathleen, and everybody that's listening and watching, including you, maureen. I want you guys to envision what I describe, because we're all going to be sending that healing to Kathleen, and then, Kathleen, your spirit will integrate the healing as it chooses, right? Nobody ever heals anybody else. We all heal ourselves. No doctor, no shaman, no medical provider, no healer like me. We send the healing to you and then your spirit integrates the healing based on what it wants to explore and experience in this life, and the one thing I want you to remember is that everything is healable. Everything is healable and I have seen amazing miracles over the years by doing these healings, tens of thousands of them, literally. So here we go. Here comes my laser beam from Sweet Home, Alabama, heading up to you in Philly. All right, got you Shooting energy from your feet up through the top of your head. We're going to do the full cancer healing. So imagine there's a big vertical oval tube that's inside your body, but it's on the front side of your body, and imagine that all of your lymph fluid has gone in there and it's spinning. And imagine that there are two holes, one on the bottom of each of your feet, and as that lymph fluid, which is an amber color and it's kind of globby have you ever seen a lava lamp? It's what the fluid looks like in a lava lamp. So the toxins are coming out the bottom of your feet, out of your lymph fluid, and so that's spinning. We're going to layer these healings on top of one another, so they're all going to be happening spinning. We're going to layer these healings on top of one another, so they're all going to be happening concurrently.

And so next there's this big metal dome that's come down on top of your body and these are analogies for the healing that's happening, to give us a human frame of reference for this woo-woo healing that we're doing, this energy healing. So the dome has come down on top of your body. As it lifts off, it's pulling out all of your lymph nodes that have sequestered toxins. And lymph nodes, Kathleen, look like little D3 vitamin capsules and when they've sequestered toxins they can look brown or black. Inside of them it can be a dot, it can be the whole thing looks brown or black. And they're all being extracted out the top of your head. So the lymph fluid toxins are coming out the bottom of your feet and the lymph nodes that need to be extracted are coming out the top of your head. So your whole body is involved in this healing. And now you're being sprinkled with stem cell energy, which is a light amber colored gel, has sparkles in it because it's woo, woo got to have sparkles and it reminds me of this hair gel when I was a kid called Dippity Doo in the 60s and 70s, and so you're being sprinkled with that. And now there are vortexes, vortices that are spinning above your head, beneath your feet, on either side, front and behind all spinning concurrently and that's going to regenerate new lymph nodes in your system.

Next, what we're doing is a heavy metal detox. So imagine two big U-shaped magnets and they're joined in the middle and they go around your whole body and they're going up and down your body and they're pulling out metallic particulates. Those can look like a sparkly piece of glitter or a dull piece of glitter. They can also look like a strand of steel wool out of a steel wool scrubbing pad used in the kitchen, you know, to scrub pots and pans. And as those magnets are going up and down your body, pulling out those particulates, they turn a quarter

of a turn till they make a full rotation all the way around your body. So they turn a quarter of a turn and go up and down another quarter of a turn, up and down. All right, they just popped off. Now any kind of metallic dust that's left over is being irrigated out the bottom of your feet in those holes that have opened up. So that's happening.

Now we're going to do a DNA healing. Dna, of course, is the recipe that tells the cells how to behave, and it's comprised of four nucleic acids. They're represented by four letters A, t, C-G. One strand can have 100,000 letters on it, can have up to a billion letters on it. The strands look like a piece of paper you'd see inside a fortune cookie with the fortune written on it, if you can imagine that. So you have 10 strands of DNA that have come out of an X chromosome, because, remember, girls have two Xs and boys have an X and a Y. I'm taking you back to your fifth grade science lessons here. This is a review.

I had to re-educate myself on this stuff when it first started showing up, because I'm like I know it's DNA but I don't remember about it. So I had to, you know, re-educate myself. So got that going. Those letters are getting re-sequenced back to a normal recipe. When somebody has cancer, it mutates, the DNA and the cells replicate in ways that we don't want them to. So it's going back to a normal recipe right now. Once that strand's reconfigured, it snaps back in. So we have five of them done. We got five more to go and it goes really fast. It's like have you ever played Scrabble, the word game, where you move the letters up and over and around to form a word? That's what this is like, but it's just in warp speed. Okay, two more strands, all right. One more strand, all right, that one's in. So we've got that going.

I would suggest schedule an appointment either with me or with one of my graduates. I have five graduates that do appointments, too, on everything, not just medical, but the whole buffet of psychicness. You know, you can talk to a deceased loved one. We can do your pet all this stuff we do on this show, and I'd really like either for one of them or for me to do a full, deep dive with you on this. We've done the preliminary stuff, but you can usually get in to see my graduates within a week or less and they're way less expensive than I am and they're fabulous every one of them. So I would highly recommend that you schedule an appointment and let's do a full hour of working with you to get you all well and get you healed.

The good news is you're not dying, girl. Your spirit's in your body and, yeah, so that's good. That's like the most important thing right now. You're not dying at the moment. For those of you that are watching her big sister, maureen, just gave her a hug. So, yeah, if your spirit was out of your body, I wouldn't be able to scan you and do those healings on you, because it's like I said with the Pomeranian, it's like I'm looking in a dark room without any electricity and I'm unable to see inside somebody or some animal's body. So, yeah, yeah, I think for the most part you look healthy for everything that you've done, but we can stay five steps ahead of the mutations with the DNA healing, and also we've got some other things that we can work on and find out what really the origin of this is and take care of that as well. Okay, All righty.

Thank you, julie. You are so welcome. You're welcome, ladies. Thanks for joining us. Hope you feel better, Kathleen, thank you. Thanks, maureen. Thank you, maureen. You're a sweet big sister. She's a sweet big sister. Yeah, you bet. All right, if you want to have a conversation with me, join me at AskJulieRyanShow.com. If you're joining us on the YouTube live stream, come in and ask Julie Ryan. Samantha's over there and she's helping people. Just put your first name and where you're located and your question in the chat and we'll be taking some more questions from over there as well. So let's see who's next. Hi, laura, how are you, girl? Good, how are you? I'm wonderful. Thanks. Where are you? I'm in Old Hickory, tennessee, outside of Nashville. Yeah, yeah, I know where that is. I used to live in Nashville. Everything's Old Hickory there. God, one of the main streets that goes on for forever is Old Hickory, but I know you're. You're what north of the of the city of Nashville, right?

0:18:26 - Laura

Yes, correct.

0:18:28 - Julie

Okay, great, how may I help you?

0:18:30 - Laura

So I've been having ringing in my ears and I'm just wondering what is the cause and what can I do?

0:18:38 - Julie

to stop it? How long has it been going on?

0:18:41 - Laura

You know it's hard to say, but I'm going to take a guess at like more than two to three years.

0:18:47 - Julie

Okay, all right, let me get you on my radar and I'm going to look inside your ear, at your ears. The spirit gives me divine downloads even before I get you on my radar and I'm hearing go to your left ear first, so I will do that. Do you notice that there's a difference between your left and your right ear?

0:19:06 - Laura

Yes, absolutely. My left is worse.

0:19:09 - Julie

Left. Okay, that's what I'm hearing from spirit. And when I say I'm hearing, Laura, what that means is I'm getting information downloaded into my head. So it's a thought in my head and I'll say, okay, I'm hearing this and that spirit communicating to me. It feels like a thought in my head. So here I'll say, okay, I'm hearing this and that spirit communicating to me. It feels like a thought in my head. So here we go.

Here comes my laser beam from Sweet Home, Alabama, heading up I-65 North, not too far about three hours, and got you shooting energy from your feet up through the top of your head. Do you remember having an ear infection when you were little? Or at some point in your life you've got a perforated eardrum. That happened at some point in your life. Oh, you know what I do remember? Okay, all right.

So imagine that the eardrum looks like the membrane on the top of a pair of bongo drums pair of bongo drums. And imagine that you've got a scar in the middle of that eardrum and the scar is not flat. It didn't heal flat. So the reverberation is getting messed up, probably involving congestion and things like that in your ear. So we're going to we'll roto-rooter out your eustachian tube here in a second. But what I'm watching happen, Laura, is I'm watching the eardrum itself, that area where that scar was. I'm watching it get excised, watching it get cut out, and then there's a backing on the back of your eardrum and stem cell energy is getting placed where the part was that was just cut out. Light amber colored gel sparkles dippity-doo and there's a vortex spinning outside of your ear. So what we're doing is we're regenerating your eardrum so that it's all smooth and flat. Make sense so far.

0:21:03 - Maureen

Yes.

0:21:03 - Julie

Okay, all right, so we've got that going. And now what we're watching is we're watching that membrane get pulled in different directions. So imagine there's a face of a round clock on top of your eardrum and it just got pulled in the 1 o'clock position and then the 7 o'clock position and the 11 o'clock position and the opposite, the five o'clock position, and then on the sides, and then I watch musical notes, energy and sound wave, energy bounce off your air drum and then it gets pulled a little bit more so it's getting fine-tuned, similar to a pair of bongo drums. The tone of the drums is going to be predicated on how tightly that membrane on the top is pulled right so you can have, you know, multiple drums in a row and each one's going to have its own unique sound. And so that's what I watch happen. So I'm watching that.

Then there's a corkscrew that's spinning in your eustachian tube and it's cleaning out any kind of congestion that's in there. It just kind of looks like fog in there, and so imagine that this corkscrew, as it spins, it just whips up the fog and removes it out of your ear, so you may feel like air coming into your throat or something when that's going on. I've had several people say that they felt that when that's happening. All right, let me look at your right ear and see if there's it's left ear. This is your left ear. It's causing it. Your right ear looks fine to me. So a couple of things you can do on your end to help with this. Acupuncture has been very effective for tinnitus.

Also ginkgo biloba extract has helped a lot of people, and also progesterone the sex hormone, progesterone. Are you on hormones? Progesterone the sex hormone, progesterone Are you on hormones? Okay, you may want to look into that because it's been very effective with many of my clients and also there's research that supports it. So I would try one or all of those different modalities and see if any of them help, because the healing has already happened on the energetic level. Now it'll just integrate into your body. Oh my gosh, thank you so much. You are so welcome. Thanks for joining us. Thank you. Bye, Laura, all righty.

Askjulieriaryanshow.com if you want to have a conversation with me. Julieryanshow.com. If you want to have a conversation with me, if you're coming in and joining us on the YouTube live stream. We're at Ask Julie Ryan. Put your first name and where you're located and your question in the comments and we'll be taking questions from there. Remember to subscribe, remember to leave a comment so you're entered into the drawings, and remember to go to AskJulieRyan.com and sign up for my blog, because you can always submit a question there. But the questions that we choose are always really interesting, and so is Spirit's Answer, and I do one of those every Thursday, and then, plus, you get a reminder in your email hey, you got a question. Call into the show tonight and here's the call-in information and all of that. So it makes it easy. All righty, let's see who's next.

Sondra. Hi, Sondra from Kansas. This is a touchy subject, but could I have a healing for my painful hemorrhoids? Oh honey, I'm so sorry. I'm a 51-year-old teacher trying to enjoy summer break. Oh, I bet you probably just got out of school. Thank you, love your show. Oh you, sweet thing.

Okay, yeah, here we go. Here comes my laser beam from sweet home, Alabama, and now to you in Kansas. All right, what we're doing is I watched this laser beam and I've done this a lot. So this healing eye you know when I say eye, it's spirit working through me and with me to help you heal yourself, because, remember, nobody heals anybody else, we all heal ourselves. And so what I'm watching is I'm watching this little laser and what it's doing is it's lasering the hemorrhoid, both on the surface and you've got some that are underground, for lack of a better word. So we're watching the laser happen and it's cutting off the blood supply. So what the laser does is it cauterizes it, so it stops the blood supply coming into the hemorrhoid to, you know, to make it flare up, and I understand those are really uncomfortable. I'm so sorry. So there's that.

The other thing that I'm being led to tell you is there's a product and I use it every day. It's called Brain Octane Oil. Brain Octane Oil you can get it on Amazon. It's by a company called Bulletproof. My buddy, Dave Asprey, came up with it and then he sold the company, but Bulletproof still sells it and it's a highly refined coconut oil, Sandra, and it's going to help things move smoothly there.

So it's not going to be painful and it also it's the number one thing that's kept me off sugar for six years, because it provides ketones and the brain works either on ketones or on glucose. And when I was giving up sugar six years ago, my buddy Dave said oh, you got to use this brain octane oil stuff and I'm telling you it's miraculous, it's just amazing. So that will help you too, and you're going to completely heal from this. If you need to go have that procedure done at the doctor's office, do it. It will be swift, easy and you're going to be really glad that you had it done, but I don't think you're going to need it. From what I'm seeing and what I watched in the healing, I think your body is going to take care of it on its own and integrate the healing in, but get some of that brain. Octane oil, too, comes in capsules, comes in a liquid form, and it's going to help as well.

So thanks, Sandra. Hope you feel better. Enjoy your summer break. Thanks for teaching the kids all right. AskJulieRyanShow.com. We're at Ask Julie Ryan on the YouTube live stream. We're at AskJulieRyan on the YouTube live stream and we're taking questions from both places. So let's see who Chris has lined up next. Hi, Cheryl.

0:28:06 - Laura

Hi, hi, Cheryl, hi, how are you? I'm okay. Actually, I see my friend Lynn on here. I asked her to come on so she could get a healing from you, if possible. She's in Delaware. Her granddaughter was in a horrific head-on car accident one year ago today and she doesn't remember any details about the car accident. So what we wanted to ask if you could possibly give us any information about it, like what happened, and if you could do a healing for Kimmy, because she's just had so many issues.

0:28:48 - Julie

Oh, and she has been dealing with concussion symptoms since, I believe. So, okay, and did she go to the hospital during the accident?

0:29:00 - Laura

They took her to shock trauma and I just think she's been having a, from what I've heard, just a really hard time since then, just because with her memory not being able to remember any details and there was just a lot of things that happened. And if there's just any information that you could give just to give some peace of mind, some healing for her, this would just be wonderful. Since I limited to one question per person.

0:29:28 - Julie

I'm going to go ahead and do a healing on her, because that's more important at this point, but what I would suggest is schedule an appointment either with me or one of my graduates and we can get all those details about what happened. We can do instant replays and do that. But let's do a healing on her because that's more important.

0:29:46 - Laura

I appreciate it, thank you.

0:29:48 - Julie

Yeah, so what I'm going to do, where is Cammie? Cammie lives in Delaware. She's in Delaware too, okay, all right, so I'm going to hook into you and then I'm going to go from you to Cammie and I'm going to ask her permission if I can scan her, and if she says yes, I will.

If she says no, I won't you know, this because it's an ethical thing with me, but we can still talk to her spirit and see what we can get done for her. So here we go. Here comes my laser beam from Sweet Home, Alabama, head to you. Got you All right Going from you to Kami Kami. I'm talking to your grandmother's friend, Cheryl. Is it all right if I scan you energetically? She said, yeah, I hope it helps so good job setting that up.

Somebody set it up All right, so got that Shooting energy from her feet through the top of her head, the hologram that's her in my mind's eye. Cheryl's been turned around to the back, so I'm going in to the back. She's got a bunch of scar tissue in her brain. The brain matter looks to me like thick cooked oatmeal, and scar tissue in the brain looks like chicken cartilage, the kind you'd see in a chicken breast with the bone in. And so what I'm watching is I'm watching the scar tissue get scooped out and it leaves a divot in the oatmeal-like brain matter and that's where the stem cell energy is going in. To fill those divots, light, amber color gels, sparkles, dippity-doo vortex above each area. Each area gets its own vortex and that's regenerating brain matter. When we see a lot of scar tissue in the brain, Cheryl, what's happening is it can occlude neural pathways, and neural pathways look like laser beams that crisscross a room that are part of a museum or a home or a building security system. You know where you got those laser beams shooting across the room. You may have seen that in a movie, with somebody trying to steal something from a museum and they're jumping over the laser beams or rolling under them or whatever. So as we regenerate new brain matter, what's happening is those neural pathways will come back online. She's got a lot of it so it looks like it was a. Obviously it was a bad accident, because she has no memory of it and so we've got that going on. All right, okay, brain Matters regenerated laser beams are all set up.

It's really important to help her heal her brain, for her to take a bunch of omega-3s, so the brain octane oil I was talking about purified burpless fish oil and do an internet search on healing concussions Again, my buddy, Dave Asprey. If you just do an internet search, Dave Asprey, concussion healing, the whole protocol is there of what to do. But it's really important to help heal a concussion and it can even be years later. They can be healed. It's really important to give the brain lots of omega-3s to help it heal and then schedule an appointment with one of my graduates, or me for Cammie, or have Cammie do it, or her grandmother, your friend, and then you know we can do a deep dive with her and see what else we can do to help her heal. So you're sweet to call in for her.

0:33:23 - Laura

Oh my gosh, I know this means so much to her and her family, so thank you so much, Julie. You're most welcome. I'll join next week so maybe I can get back in for myself, but I know that's important to them. So thank you, you bet. Thanks, Cheryl.

0:33:40 - Julie

Bye. Askjulieryanshow.com. Ask Julie Ryan on the YouTube live stream. Put your first name and where you're located and your question, and we will get a bunch of those answered. Remember to subscribe. Remember to subscribe. Remember to leave a comment, then you're automatically entered into the drawings for our free session with me and also for a free class. So let's see who's next. Hi, Trina.

Trina taking my medical intuitive class Fabulous Last week, girl. Next Monday it'll be so funny, or so funny, so fun. It'll be funny too. And for those of you that want to take the medical intuition class, just go to askjulieryan.com, go to the training page and you'll see it there. So our last live session is next week, but it's recorded and you can take it anytime. You can take it five years from now if you want.

And again, since time doesn't exist in the spirit world, time's a human creation. The same vibration, the same energy is sent to you, whether you're taking it live or whether you're taking it in the future. So Trina has a deviated septum. Is it possible to fix that energetically? Sure, yeah, absolutely. So where are you, girl? You didn't tell me where you are. I'll find you, but it's always fun to see where you are. So put it in the chat so Samantha can let us know please.

So here comes my laser beam from sweet home, Alabama, heading out to you. All right, got you Shooting energy from your feet up through the top of your head. It looks to me like your septum curves. So there's like a curve on the right side of your septum. So what I'm watching happen is I'm watching almost like a splint that is getting put on Stem cell energy is filling in that curve. There's a vortex spinning outside of your nose and that's regenerating a straight septum. And then what I'm watching is you know those little when you go to the nail salon and they've got those little dremels that have sandpaper on them and they spin and they take your nail polish off with that. That's what I'm watching happen on the left side of your septum and on the right side. So it's making it a normal size so that it's going to be equal on both sides of your nose. So I hope that helps.

Thanks for joining us. I'll see you on Monday. All righty, let's see who's next. That was a fun one. I don't know that I've ever had that question before or seen that healing. So that was fun. Plastic surgeons and ENTs always fix that, hi.

0:36:37 - Laura

Sheridan, I'll see you Monday too. Hot dog, I love it Wonderful. Please tell everybody where you're located. I'm in the San Francisco Bay Area in East Bay, castro Valley.

0:36:51 - Julie

East Bay. All right, you got a question for me.

0:36:54 - Laura

Yes, I would love for you to connect with a young man who passed away on Monday. No, what's his name? Sheridan? His name is Carson Carson? And how old was Carson? He turned 16 on the 16th.

0:37:19 - Julie

Oh heavens, okay, All right. What happened? Was he sick? I met.

0:37:24 - Laura

Carson in Washington State in 2022, when we were both in cancer treatment. 2022, when we were both in cancer treatment. Oh my Okay. So I've been with his family and followed him since and, yeah, he left us on Monday.

0:37:46 - Julie

I'm so sorry for you and for his family. You look wonderful, though. When you came on the screen for those of you that are watching she looks like a ballerina. You just she's gorgeous and she's got her hair up in a ballerina hairdo and I thought, my God, she looks like a ballerina, so okay. So what would you like to Carson's right next to you, on your right, and they come right in? Do you have something you want to say to?

0:38:15 - Laura

him? No, I want him to. Is there anything for his family? What would he like his family to know?

0:38:24 - Julie

They were heroes, he's saying when we talk to spirit it's been my experience, sharon, in that they it's like priming a pump for a water well at a farm. You know, you got to pump it a few

times to get the water to flow. Same thing with the energy. So when we say a few things to him, then they usually always get chatty. But he's saying that he wants his family to know that they were his heroes in how they went out of their way to take care of him and be with him and show him love and that there's nothing that they could have done differently that would have changed things. It was all perfect, is what he's saying. That's going to be hard for them to swallow while they're grieving because you know, we all second guess ourselves what if we would have done this? What if we could have done that better? What if, what if, what if, what if, what if? And he's saying the what ifs are irrelevant because everything unfolded perfectly. And he's saying that they told him that he was being heroic. But he said but it was them who were being heroic, because he knows the pain and anguish that they went through when he was going through all this treatment and everything. He's saying that the suffering that he see what I told you they get chatty once we get them going. He's saying that the suffering physical suffering that he went through during his treatment was mild compared to the emotional suffering that he knew that they were going through his family.

And he's saying that he was never afraid of what was going to happen when he transitioned, when he passed. He was saying he was never afraid and he's saying it was more glorious than glorious. Than what do you say? He said something like it's more glorious than one can imagine glorious being. That's verbatim from him. When he transitioned my book, angelic Attendance you know what happens. Send them a copy of it. Send them the free link you know, julieryangift.com. You can also get it off my Ask Julie Ryan website. Send that to them, have them. Send it to everybody in their circle family members, friends. It will give them a lot of comfort about what went on.

0:41:08 - Laura

Yeah, as you transition, I was going to also refer them to Helping Parents Heal.

0:41:14 - Julie

Yes, that's a wonderful organization.

0:41:17 - Laura

Yeah, so can you tell me, did he say, has he appeared to them? Has he shown up at all to them in a way that they might recognize or know?

0:41:30 - Julie

He's saying yes, he's around them all the time. He's saying he's showing me and he's laughing because he showed me what he looked like. And then he said kind of like Casper the friendly ghost, like the TV you know cartoon when we were kids. And he's saying that he appeared in his parents' bedroom and it looked like a fog in the room and so he's talking about his mother, thought it was her imagination. Has she told you that she felt like she saw that? Has she told you that she felt like she saw that?

0:42:05 - Laura

No, I haven't talked to her yet one-to-one, I just have sent a message because it's so fresh and so new. But she did say that all three of them his mom, his dad and his sister as they were traveling home, they each saw a symbol and said that they felt that it was definitely him. So I just wondered if that was correct and if he would actually name that.

0:42:41 - Julie

Yeah well, we can ask him in particular, yeah, what those symbols were. Let's do that in a session, you know, schedule an appointment with one of my graduates or me. But he's telling me his symbol to his mom. His sign to his mom is he appeared like Casper the Friendly Ghost, you know, without the white sheet, but just like in that shape, and he's saying he flew across

the room and he looked like fog and his mom saw it for an instant and then she thought, oh, I'm losing my mind. But that was really his spirit, that he was showing her.

So the other thing too about these, Sheridan, is when they tell us a sign or they show us how they're appearing to loved ones, it can happen, you know, even if they missed it, that means that he's going to do it again, most likely, and to be aware of it. So you know, be on the lookout for that. I don't know that I've ever had anybody tell me that that's how they appeared before. I've talked to thousands of spirits at my time, but I think that's really cute. Casper the Friendly Ghost, you know who was pure joy, and so there's lots of information there for us. He's in pure joy, pure bliss, everything unfolded perfectly, and he thinks of them. There for us, he's in pure joys, pure bliss, everything unfolded perfectly, and he thinks of them as his heroes. So I hope, send them the link to this show and they can listen to it themselves. I will, I will do that, okay. My ballerina, Mike Ballerina, you look great, keep up the good work.

0:44:20 - Laura

I'll see you Monday. Thank you Okay honey, thanks Bye.

0:44:28 - Julie

Oh God, how fun is that. You know they use these analogies spirits do to number one, lighten the load, you know, when somebody's grieving to be talking about a fun cartoon that many of us watched growing up. And heck, they probably still have reruns of Casper, the Friendly Ghost, and you can't think of that without smiling. And I find that spirits will do that a lot. They will come in with things that are joyful sounding or they make people smile because they don't want them to be sad, because they're joyful and everything's amazing in heaven. So how sweet for sharing. We got all these sweet people calling in tonight helping their loved ones and friends always a treat. Okay, let's see who's next.

Connie, hi, Connie, from Wisconsin. Can you see what past life would possibly be affecting me in this life? Well, they all are. I have depression, low self-esteem and abandonment issues. Love watching and listening to you. Oh, I'm so honored. Thanks for joining us. Okay, yeah, so they all are.

So let's, we'll figure out what the one is that correlates the most. All of our past lives affect our current lives and we all live bazillions of past lives. Yeah, I mean like thousands and thousands and thousands of them, because, remember, time doesn't exist in the spirit world. Time's a human creation. So you know, a hundred year lifetime to us seems like a long time, but it may not even be a blip on the radar screen in spirit time. So how I do this, Connie, is I envision myself in this endless hallway. The hallway's narrow, the ceiling's very tall. On the walls are these 12 inch by 12 inch square mirrors, lined up perfectly in columns, both vertically and horizontally. Each mirror represents a different lifetime. So as I look down the hallway, this endless hallway, the mirrors that are really far out look like dots on the horizon, and there are some I can't even see from my vantage point. So I'm in the Connie Akashic Records is what I think is going on. I didn't know that when this first came in, but now, after talking to some Akashic Records experts, I think that's exactly what we're accessing. So we're asking a question does Connie have any past lives that are contributing to her depression issues in this lifetime? And the mirrors that correlate with that question come out from the wall as if they're on a hydraulic arm. There's a bunch of them that have come out All right. So now we're taking a step further. Show us the one that correlates the most that one comes out, the farthest it's down on the right. I see myself going down to it's kind of midway up this wall, so I watch myself walk into the mirror. It's like I'm walking into the scene of a movie.

1914, I get, is the year Poland, Warsaw. Okay, 1914. I don't remember when the First World War was, but certainly I think it was about that time or it was in the making. All right has something to do with war.

You were a man, you were, oh, you were working in a munitions plant, all right, and it was not great, it wasn't a great working environment. So I'm watching that hot, sweaty metal, you know like a big furnace, like lots of furnaces. You know if there's a metal manufacturing facility, especially back then and even now you know there's lots of furnaces, lots of heat, dirt, that kind of stuff. So you're doing that and you just feel like slave laborer because they're paying you just hardly, you know pennies on the dollar kind of an equivalent but you're being expected to work there.

So how does that correlate with what's going on in Connie's current life?

I get that you've been in jobs and situations that you didn't want to be in but you felt that you didn't have a choice and you weren't paid what you felt that you deserved and the work environment was not great.

The work environment was not great. So there's always a semblance of a script from past lives that is materializing in this lifetime and it's to help us have a different frame of reference for what we're exploring and experiencing in these multiple lifetimes, kind of like a script, and you're looking at it from a different perspective. Same basic not good work environment, not getting paid for you know what you're worth and kind of like feel like slave labor kind of a thing. So yeah, by illuminating it, it gives us information and lets us know, when we're feeling that, that we have the power to change in this lifetime, you know, with all of our advantages. So if you're in a work environment that you don't like, go find another one because you have the capability and the power to do that. I hope that helps, connie. Thanks for your question, alrighty. Let's see who's next. Hi, azure.

0:50:24 - Ahzure

Hi Julie Ryan, Thank you so much.

0:50:26 - Julie

How are you? You're welcome. Where are you?

0:50:29 - Ahzure

I'm from Houston, Texas.

0:50:32 - Julie

All right, terrific. How may I help you?

0:50:41 - Ahzure

So my mom, she transitioned this past weekend five years straight, so it's been a while and I've been caretaking for her.

0:50:44 - Julie

God bless you.

0:50:44 - Ahzure

I have your book and it brought me a lot of solace and comfort, so I really appreciate that. So I was wondering if you could do like an instant replay or see if there's anything that was going on. My dad is still breathing and they're a Buddhist faith, so he's he's wanting her to get off the wheel of karma and re-embodiment, so I wonder if that was different from what was going on.

0:51:09 - Julie

Yeah, yeah, yeah, all right. So what's your mom's name?

0:51:12 - Ahzure
Melody.

0:51:14 - Julie
Melody. All right, so you want me to do an instant replay or you want to just talk to her?

0:51:20 - Ahzure
Whichever you think is.

0:51:22 - Julie
That's whatever you want, honey, I'm here. Whatever you honey, I'm here, whatever you want.

0:51:26 - Ahzure
I'm free, but.

0:51:27 - Julie
I'm not cheap. I mean, you know really. So, okay, all right, all right. So, like you heard me say earlier, it's like priming a pump at a water well. You got to pump it a few times first she passed last weekend.

0:51:43 - Ahzure
You said yeah, this process started.

0:51:46 - Julie
yeah, Okay, all right, melody, all right, she's right next to you, she's on your right. They always come in on the right. She's kind of looking like a little tinkerbellish, though. She's kind of flitting above your shoulder and then she lands and then she flits a little bit more. She kind of goes airborne. I don't see wings, but she's having fun with the weightlessness you know. You see, when you're in Houston, you know how you see the astronauts when they're preparing to go in space and they're in the anti-gravity chambers and they're having a ball because they're doing flips and moving up and down and stuff effortlessly. That's what she reminds me of. So she's doing that.

So she's saying she doesn't have anything to get off of, like what you mentioned your dad's worried about. She's saying yeah, that's just, it's not real. She's saying she's in heaven. It's glorious. I call it heaven. You know non-physical, you can call it pure spirit. She's saying that everything unfolded perfectly. They usually say that even if it seems horrific to us when we're going through it. She's saying you are an angel of mercy her exact words and you did a superb job. Her exact words of taking care of her. She's saying you made her transition much easier than it could have been. Did you do something special? Did you have hospice involved?

0:53:21 - Ahzure
Yeah, I gave her morphine and my family was really against it. We kept going. They said I was accelerating her death. It was a big argument.

0:53:28 - Julie
You're not. No, you did it perfectly, and she's saying you are an angel of mercy and she thanks you for that. Yeah, she said great job following your gut and following your instincts, and she's so grateful that you helped her in that way. Let your family watch this video if they'd be willing to, but give them my book too. So there's that. Did you have other stuff you wanted to know from her?

0:53:58 - Ahzure
Was there any messages she had for any of the family or anyone she wanted to relay it to?

0:54:05 - Julie

She loves them all. She's saying that she, this is cute. She had a cute sense of humor, didn't she?

0:54:12 - Ahzure

Yeah, she was pretty spunky.

0:54:14 - Julie

She says I have a bunch of special powers now that I can help you. And so she's saying ask for her help. Because she's saying spirits can interfere. We can put ideas in your head, but we can't interfere unless you ask for our help. So if there's something that you need help with, she's saying I can use my special powers to help you. How sweet is that. So she wants you to go live your life. She's saying that you dedicated enough time of your life to taking care of her, and she wants you to follow your dreams and go do what it is that you know that you've put on the back burner so you could take care of her. She's saying you can be sure I'm gonna take care of you from heaven. So she's saying ask her for help again in things. She's saying anything you want to know, you just ask her. And she's saying she has access to universal intelligence, as all spirits do, and she will put the downloads into your head.

This is she put a oh gosh. What can I compare this to? It's like it was like a plastic. Have you ever seen a pharmacist filling a prescription with pills? And they've got like a plastic. It's almost looks like a slide that's curved up a little on the sides and the pills can go into the bottle easily. She's saying that she's going to put the ideas into your head when you ask for them and she showed me this like slide thing that the ideas are just going to go down the slide and go right into your head Kind of like a funnel.

Nah, not a funnel, More like if you had a straw and you sliced it vertically in half. So the edges were still curled up on the sides.

0:56:08 - Ahzure

Got it, got it.

0:56:10 - Julie

So she showed me that. But wider than a straw. So she's saying that. She's saying all right, so is there a girl you're interested in? She's talking about your love life. Is there somebody you're interested in or somebody?

0:56:24 - Ahzure

in your life. At one point I was yeah, yeah, she's in Okay, wow Okay, there's somebody coming.

0:56:31 - Julie

There's somebody coming.

0:56:33 - Ahzure

For me, yeah For you.

0:56:34 - Julie

Oh great. Yeah, yeah, yeah, yeah. So get ready. She's saying they're pre-approved, pre-approved by mom in heaven. So yeah.

0:56:45 - Ahzure

Match made in heaven.

0:56:47 - Julie

Schedule an appointment with me or with one of my graduates, and we'll do. We can. We can talk to her for an hour and get all kinds of information from her, and that'll be a blast, thank you.

Yeah, I hope. I hope that information brings you some joy in such a tough time for you all. But the big thing that I heard out of all of that was thank you for helping her with the morphine and thank you for following your intuition and your gut and helping her not be in pain as she was transitioning. So kudos to you, sir.

0:57:26 - Ahzure

Thank you. Thank you so much, julia, you're welcome, you bet.

0:57:30 - Julie

Thanks for joining us. How sweet is that. I hear that more often than not that some people believe that morphine or other medication at the end of life is going to speed their departure, and that's really a fallacy. And anybody that's worked in any of the critical care areas like ICU, ccu, er, that kind of stuff, and also hospice personnel, hospice medical providers we'll all tell you that it helps the patient relax and it helps them pass easier. They don't have to struggle as much. Furthermore, all spirits decide. We all decide when we go, where we go, how we go, who's with us or not when we go. We think we have control over that. We do not ever.

You think about if somebody gets shot doesn't mean they're going to die. Lots of people get shot but they don't die. It's the person who dies from being shot. Their spirit decides to exit in that manner. So always keep that in mind, that the body knows how to be born and the body knows how to die, and the spirit is always in total control of that as well.

So it's natural for us in the grieving process to think the what ifs like we talked about earlier. What if I would have done something differently? What if we would have gotten her in the hospital sooner? What if, what, if, what, if? And really it's always the person who's passed. It's their spirit's prerogative how they go. So keep that in mind when you're enjoying somebody's last days on earth and helping them pass and taking care of them, because it is truly a labor of love and they all appreciate it All right. On that happy note, I am going to send you lots of love from Sweet Home, Alabama. Have a great weekend, everybody. See you back here next week. 8 pm Eastern, 7 pm Central, 5 pm Pacific. Every Thursday night. Call in, ask your question, join us. Bye, everybody, have a great weekend.

0:59:53 - Annncr
